Introduction

Nepal is situated in South Asia. It is also known as the land of Mt. Everest, the highest peak of the world and the birth place of Lord Buddha, Lumbini. Nepal is a land locked country, which occupies 0.03 % and 0.3% land area of the World and the Asia respectively. It has diverse topography and climate. It stretches from east to west with an average length of 885 kilometers and widens from north to south with an average breadth of 193 kilometers.

Geographically, Nepal has three east-to-west elongated ecological belts. The northern mountain belt is naturally decorated by an unbroken range of Himalayas, which contains eight peaks higher than 8,000 meters, including the world's highest peak Mt. Everest (8848 meters). Middle hilly belt is enriched by gorgeous hills, valleys and lakes. Kathmandu, the capital city of Nepal is situated in this region. Terai belt is the plain area situated in southern part of Nepal, which is usually known as the grain house of the country since most of the crops produced in Nepal are farmed in this region.

The Constitution of Nepal (2015) has declared the country a Federal Democratic Republic with seven Provinces. It is further divided into 753 local levels including 460 Rural Municipalities, 276 Municipalities, 11 Submetropolitan Cities and 6 Metropolitan Cities. There are 77 administrative districts in Nepal.

According to the National Population Census 2011, the annual growth rate of population is 1.35 percent and the total population has recorded about 26.5 millions with sex ratio 94.2.

The preliminary estimate of GDP per capita at current price stands at NRs. 117455 (US\$ 1034) for the fiscal year 2018/19. Growth rate of GDP at basic price is estimated to be 6.81% for the same fiscal year. About one fourth of the population (25.16%) lives below poverty line as per the Nepal Living Standards Survey 2010/11 and Gini coefficient, which indicates inequality in consumption expenditure stands at 0.328.
