Foreword

It is my pleasure to bring the results of the latest National Population and Housing Census 2021 through this provincial volume. This 12th series of population census was carried out as part of integrated national statistical system to generate fundamental demographic data at the most granular level, which also serves the provisions of the Constitution of Nepal.

Robust, reliable and timely data are required to monitor national and provincial development goals including the localization of SDG indicators. The census results provide population data to measure progress and assess how well Nepali people are enjoying their fundamental human rights to basic services, as enshrined in the Constitution. I am optimistic that the census data will be used for policy and planning decisions, including identifying marginalized populations, and understanding development gaps and challenges.

The census process and results were designed and managed to generate comprehensive demographic, social, and economic data in consultation with stakeholders. This census attribute is more important than ever as there is enormous demand for high granularity dataset in Nepal's new context of federalization in social and economic planning, provision of social services and resource utilization.

The successful completion of this census was a challenging task amid COVID-19 and we would have never been able to accomplish this without the support from all stakeholders. The entire team of National Statistics Office led by the Director General of former Central Bureau of Statistics have put dedicated effort to bring this huge statistical operation to conclusion. I would also acknowledge the cooperation, technical inputs and support from all levels of governments and UNFPA for coordinating the support on behalf of the development partners.

I like to acknowledge the effort made by the working team in the population section of the office who have worked hard to compile province specific data to produce this volume in time.

I would like to thank all the respondents who trusted us and provided their truthful information to us and all the enumerators, supervisors, local and district census officers who worked in the field in different capacities to make this census successful.

Finally, I urge all the users to make use of this publication and provide us comments or suggestions. The census results can also be checked in the web portal, infographics and mobile apps dedicated for the census where more detail information can be obtained.

Preface

With the enactment of the Statistics Act 2022, the Central Bureau of Statistics (CBS) has been upgraded to the National Statistics Office (NSO), led by the Chief Statistician at the Secretary level. This act replaced the 64-year-old Statistics Act 1958, which had established CBS under the leadership of the Director General at the Joint Secretary level.

CBS conducted the 12th National Population and Housing Census (NPHC). It was originally scheduled to take place from June 8 to 22, 2021, but due to COVID-19, it was postponed for five months. Finally, the census was conducted from November 11 to 25, 2021, for a period of 15 days. The UNFPA's latest guidelines were followed during the census. This report presents statistical tables at the provincial, district, and municipal levels, derived from the topics covered in the census questionnaires. The data analysis is still in progress. The report also provides insights into various aspects of the census operation, including its procedures, concepts, methodology, quality control, logistics, communication, data processing, challenges faced, and other management aspects.

Numerous organizations and individuals made invaluable contributions to the successful completion of this census. I am extremely grateful for the commitment and hard work of everyone involved. I express my gratitude to the Directors of the Population Section, Mr. Dhundi Raj Lamichhane and Mr. Keshab Kumar Gautam, for their leadership in managing and analyzing this publication. I also appreciate the efforts of the Statistics Officers, Mr. Nanda Lal Sapkota, Mr. Deenanath Lamsal, and Mr. Nirajan Sharma, as well as the Computer Officers, Mr. Dol Narayan Shrestha and Mr. Khadga Bahadur Rana and the Statistics Assistant, Mr. Bishnu Raj Regmi, in preparing this publication from scratch.

I extend my sincerest appreciation to all respondents for their invaluable contributions in providing responses to the census questionnaire. I hope that this provincial volume will be extremely useful and meet the needs of the users. I also request all users of this report to provide us with suggestions for any improvements we can make.

I encourage all users to check our census website for infographics, reports, and mobile apps that provide detailed information.

The NSO always welcomes your feedback!

Nebin Lal Shrestha
Deputy Chief Statistician
(Former Director General, CBS)

Part I:

Key Results

- 1. Population:** The total population of Lumbini Province, as of the census day (25 November 2021) is 5,122,078 of which the number of males is 2,454,408 (47.92 %) and the number of females is 2,667,670 (52.08 %). Accordingly, the sex ratio is 92.01 males per 100 females. The total population was 4,499,272 with sex ratio of 90.73 males per 100 females in 2011.
- 2. Population of other gender:** In the 2021 census, information about the total number of male, female and 'other gender' (sexual and gender minorities) usually living in the households was collected through the house and household listing form in the first phase of census fieldwork. Accordingly, there are a total of 2,928 individuals (0.01 percent of the total population) reported as 'other gender' nationally. However, in the main questionnaire, the detail characteristics of the individuals from this community have been enumerated under male or female category based on their biological sex. The population of this community in Lumbini province is 14.8 percent of the total 'other gender' population.
- 3. Annual average population growth rate:** Annual average population growth rate in Lumbini province is 1.24 percent in 2021. Whereas this rate is 0.92 percent in national level. By district, the annual average population growth rate is the highest in Rupendehi (2.33%) and the lowest in Gulmi (-1.23%) within Lumbini province.
- 4. Population density:** The population density (number of people per square kilometer of area) in Lumbini province is 230 in 2021, which was 202 in 2011. Among the districts in Lumbini province, the highest population density is in Rupendehi district (825) and the lowest in Rukum Purba district (34).
- 5. Population by broad age group:** The census 2021 shows that 61.9 percent of total population of Lumbini province is between the ages of 15–59 years. Similarly, the population aged 14 years or below and 60 years or above are 28.5 percent and 9.6 percent, respectively.
- 6. Number of households:** The number of households in Lumbini province has increased from 885,203 in 2011 to 1,141,902 in 2021, an increase by 29.0 percent, over the decade, of which 1,141,345 are non-institutional and 557 are institutional households.
- 7. Average household size:** The census 2021 shows that average household size in Lumbini province is 4.49 persons per household whereas it was 5.08 in 2011. Among the districts in Lumbini province, the average household size is the highest (5.60) in Kapilbastu district and the lowest (3.65) in Arghakhachi district.
- 8. Urban/Rural municipality population:** In Lumbini province, the population in urban municipalities has reached 55.2 percent, while the population in rural municipalities has reached 44.8 percent in 2021.
- 9. Districts with highest and lowest population:** Rupendehi district has the highest population (1,121,957 persons) and Rukum Purba district has the lowest population (56,786 persons) among the 12 districts of Lumbini province. Kapilbastu and Dang districts are the second and the third most populous districts respectively. Arghakhachi and Pyuthan are the second and the third districts in terms of lowest population respectively.
- 10. Number of building structures by main use:** All the building structures of the country have been enumerated for the first time in the census 2021. The building structures have been classified into 12 different types according to their main use. The main use is that for which the most part of the structure is used. There are 1,292,676 building structures in total in Lumbini province, out of which, 75.0 percent have been mainly used for residence, 10.2 percent for shed or storage, 5.2 percent vacant, 2.9 percent for business/trade, 1.0 percent for educational purpose, 0.3 percent for institutional use, 0.3 percent for hotel and lodge, 0.4 percent for industry/factory, 0.3 percent for government, 0.2 percent for health related purpose, 0.1 percent for bank and financial institutions and 4.0 percent for other (such as Kitchen) purpose.

11. **Ownership of housing unit:** Out of the total 1,141,345 conventional households, 90.8 percent reside in their own housing units while 8.3 percent reside in rented housing units in 2021. In the 2011 census, the proportions of the households residing in their own housing units and rented housing units were 90.7 percent and 8.0 percent respectively. According to the 2021 census, 0.4 percent of households live in institutional housing units and 0.5 percent of households live in other type of housing units.
12. **Main source of drinking water:** The 2021 census shows that tap/piped water (inside and outside household premises combined) is the main source of drinking water for 57.5 percent of the total households (1,141,345) in Lumbini province. Other main sources of drinking water for households are tube well/hand pump 32.8%, jar/bottled water 1.3%, spout 2.6%, covered well/kuwa 2.6%, uncovered well/kuwa 2.3% and river/stream 0.4% of the total households. The 2011 census had shown that tube well/hand pump was the main source of drinking for 44.3 % of the total households (884,757) while tap/piped water was the main source of drinking water for 41.9% of the total households.
13. **Main source of fuel for cooking:** The 2021 census shows that 53.7% of the total households in Lumbini province usually use wood/firewood as the main source of fuel for cooking. Other main sources of fuel for cooking are liquefied petroleum gas(LPG) 42.2 %, cow dung 2.1%, biogas 1.5%, electricity 0.4% of the total households. The 2011 census had shown that 71.1 percent used wood/firewood and 14.5 percent used LPG and 10.0 used cow dung as the main source for cooking.
14. **Main source of lighting:** The census 2021 shows that the majority of the households use electricity as the main source of lighting. The percentage of the households that use electricity as the main source of lighting has increased to 93.7 percent in 2021 from 66.0 percent in 2011. Other main sources usually used for lighting are solar energy 4.5%, kerosene 1.0% and other sources 0.8% of the households in 2021. The percentages of households that use kerosene and solar as sources for lighting were 20.6 and 6.6 percent respectively in 2011.
15. **Household assets/amenities:** The 2021 census results show that 3.1 percent of the total households do not have any of the household assets/amenities while 96.9 percent of the households have at least one household asset/amenity. By type of household assets/amenities, 75.5 percent of households have smart mobile phones followed by 74.6 percent of households with ordinary mobile phones. Similarly, other assets/amenities available in the households are electric fan 59.9%, television 47.0%, bicycle 46.1%, internet facility 36.0%, radio facility 33.8%, motorcycle/scooter 25.5%, refrigerator 24.4%, computer/laptop 11.1%, washing machine 2.7%, landline telephone 3.0% and car/jeep/van 2.5%, air conditioner 1.2% of households.
16. **Toilet facility:** Out of the total 1,141,345 conventional households (excluding institutional households) in Lumbini province in the 2021 census, 94.4 percent of the households use one or the other type of toilet facility, while 5.6 percent of them do not have access to any toilet facility. The 2011 census had shown that 45.0 percent of the total households did not have access to any toilet facility.
17. **Female ownership in house and land:** Overall, 23.4 percent of the total households have ownership of land or a housing unit or both (land & housing unit) in the name of female household member. The percentage of the households with female ownership of both land and housing unit is 11.5 percent, which is an increase of 0.2 percent point compared to that in 2011.
18. **Number of households operating small scale enterprises other than agriculture:** The census results show that out of total households in Lumbini province, there are 95,616 (8.4 %) households operating small scale enterprise other than agriculture with no paid employee. Among such households, 19,866 (20.8%) operate cottage industry, 47,149 (49.3%) operate trade/business, 6,294 (6.6%) operate transportation, 11,155 (11.7%) operate service related and 11,152 (11.7%) operate other types of such small scale enterprise, of which 55.6 percent are mainly operated by male and 44.4 percent by female.
19. **Absentees population abroad:** The 2021 census shows that a total of 420,906 persons from 308,073 households (27.0%) are absent and living abroad. Out of the total absentees living abroad, 367,670 (87.4%) are male and 53,236 (12.6 %) are female. In 2011 census, 410,751 persons from 285,487 (32.3%) households were absent abroad of which males were 89.4 % and females were 10.6 % of absentees population.

20. **Female household head:** Overall, 35.5 percent of the total households (1,141,902) in Lumbini province are headed by female, which is an increase of 6.4 percent points since 2011. The percentage of households headed by female in 2021 is 31.6 percent in Nepal.
21. **Marital status:** The 2021 census shows that 32.9 percent of the total population aged 10 years or above in Lumbini province are never married. By sex, 38.1 percent of the total males and 28.3 percent of the total females aged 10 years or above are unmarried. Similarly, 61.8 percent of the total population aged 10 years and above are married and 4.8 percent are widow/widower. By sex, 58.9 percent of the total males and 64.3 percent of the total females of this age group are married.
22. **Age at first marriage:** The 2021 census shows that 36.2 percent (Male: 35.2 % and Female: 37.0 %) of the ever-married population aged 10 years and above had their first marriage between the ages of 18 and 20. Similarly, 24.4 percent (Male: 14.3 %; Female: 32.1 %) of them got married for the first time in the ages between 15 to 17 years. Further, 7.4 percent (Male 3.5 % and Female 10.3 %) of them got married for the first time at the ages of 10-14 years. Some of them (0.4 %) got married for the first time under the age of ten years. Overall, the median age at first marriage is 19 years. By sex, the median age at first marriage is 20 years for male and 18 years for female. In the national level, the median age at first marriage is 19 years (For males:21 years and for females:18 years).
23. **Disability:** The 2021 census shows that 2.4 percent of the total population in Lumbini province have one or the other type of disability. Among the total persons with disability in this province, 54.3 percent are male and 45.7 percent are female. Overall, 2.2 percent of the total population of Nepal have one or the other type of disability.
24. **Literacy rate:** The literacy rate of the total population in Lumbini province aged 5 years and above is 78.1 percent in 2021 census. Male literacy rate is 85.2 percent while female literacy rate is 71.7 percent for this province. Overall literacy rate of Nepal is 76.2 percent; while male literacy rate is 83.6 percent compared to female literacy rate is 69.4 percent of the country.
25. **Education level completed:** The largest proportion (31.4 %) of the total literate population in Lumbini province have completed primary level (class 1 to 5) of education. Similarly, 21.7 percent of the total literate population have completed lower secondary level (class 6 to 8), 8.1 percent have completed S.L.C. (or equivalent) and 15.2 percent have completed higher levels (above S.L.C. or equivalent) of education.
26. **Population by place of birth:** Out of total population, 71.2 percent have their place of birth and current residence in the same local level. By sex, 80.6 percent males and 62.6 percent females have their birth place in the current residence. Overall, 7.6 percent of the population were born in another local level of same district, 17.5 percent born in another district and 3.7 percent born abroad.
27. **Population by former place of residence for current migration:** Overall, 70.2 percent of the population had their usual place of former residence in the same place as they were enumerated currently. This is 79.1 percent for male and 61.9 percent for female. On the other hand, 8.7 percent of the total population had their former usual place of residence in another local level of the respective district, 16.7 percent of the population had their former residence in another district and 4.4 percent had their former residence abroad.
28. **Population at the current place of residence by duration of last migration:** Out of the total 1,527,674 people who currently migrated, for the highest percentage of the migrants (32.2 %), the duration of stay in the current place of residence is 10-24 years, while for the lowest percentage of the migrants (3.9%), the duration of stay in the current place of residence is over 50 years. Similarly, for 3.1 percent of the total migrants, the duration of migration is less than 1 year. Likewise, in terms of duration of last migration by sex, for 29.2 percent of males and 33.6 percent of females the duration of last migration is 10-24 years.
29. **Reasons for current migration:** Marriage is the main reason for current migration which is 39.2 percent of total migrated population. Other reasons for current migration are work/job (11.7%), trade/business (2.9 %), study/training (6.1 %), dependent family member (20.3 %), natural disaster (0.5 %), agriculture (4.9 %), returnee (5.1 %) and other (7.5 %). By sex, 26.8 percent of male who migrated are due to dependent family member and 58.2 percent of female are due to marriage.

30. Fertility status (children Ever Born): The 2021 census shows that 12.4 percent of the total ever married women aged 15-49 (1,126,817) do not have any children ever born to them. The percentage of the ever-married women aged 15-49 with 2 children ever born to them is the highest at 33.4 percent. Similarly, 22.9 percent of the total ever married women aged 15-49 have 1 child ever born to them, while 0.9 percent of the women have 7 or more children ever born to them. Overall, a total of 1,126,817 ever married women aged 15-49 have given birth to 2,332,993 children as of the census date. Out of the total children ever born, 52.4 percent are males while 47.6 percent are females.

The data shows that 3.9 percent of the children ever born alive have died. Among the children who died, 57.5 percent are males and 42.5 percent are females.

31. Current fertility: A total of 76,243 children were born in the last 12 months preceding the census, of which 39,864 (52.3 %) were males while 36,379 (47.7 %) were females. Among the total children born in the last 12 months preceding the census, 35.9 percent of the children were born to women aged 20-24 years.

32. Status of living arrangement of children: Among the total 1,783,012 children (population aged below 18 years), 75.8 percent of them live with both parents (father and mother), 19.8 percent live with their mother only, 1.0 percent live with their father only, and 2.6 percent live with other relatives.

33. Duration of economic activities performed: Out of 4,184,299 aged 10 years or above usually residing population in Lumbini province, 2,625,925 were engaged in any kind of economic activities in the last 12 months preceding the census. The census results show that 38.7 percent of the population aged 10 years or above worked for 6 months or above, 24.1 percent worked for less than 6 months and 37.2 percent did not do any kind of economic work during the reference period.

34. Economically active population: Economically active population are those persons aged 10 years or above, who either performed any economic work for any length of time irrespective of whether they searched for work or not, or searched for work (part time or full time) if they had not performed any economic work in the last 12 months preceding the census. While the persons who neither performed any kind of economic work nor searched for any work in the reference period are classified as economically not active population. Of the total 4,184,299 population aged 10 years or above, 2,752,196 persons (65.8 percent) are classified as economically active and 1,420,974 persons (34.0 percent) not economically active based on the above criteria while 11,129 persons did not report their status.

35. Usually economically active population: If the total number of months actually worked and searched for work by a person is greater than or equal to 6 months, then the person falls under usually economically active population. In contrary, a person having this total less than 6 months falls under not usually economically active population. In line with this classification, out of the total 2,752,196 economically active population, 1,872,211 persons (68.0 percent) are usually economically active and 879,985 persons (32.0 percent) are not usually economically active.

36. Usually employed population: Among the total usually economically active population, the usually employed population refers to those persons whose duration of working is equal to or more than the duration of not working while the usually unemployed population refers to those persons whose duration of working is less than the duration of not working. The census 2021 shows that among the total 1,872,211 usually economically active population, 1,720,633 persons (91.9 percent) are usually employed and 151,578 (8.1 percent) are usually unemployed.

37. Economically active population by main occupation: Among 2,625,925 persons engaged in any economic activity during the reference period, highest share of people (54.0%) are in agriculture, forestry and fishery skilled workers, second largest share is elementary workers (22.7%) followed by crafts and trade workers (5.5%), service and sales workers (4.6%), managers (4.5%), professionals (3.1%), plant and machine operators (2.6%), technician and associate professionals (1.3%), office assistants (0.9%) and armed force (0.5%) respectively. The classification of the occupation is based on Nepal Standard Classification of Occupation (NSOC).

38. Economically active population by main industry: Industrial division of economic activities have been coded

according to Nepal Standard Industrial Classification of all economic activities (NSIC). Among 2,625,925 persons engaged in any economic activity in the last 12 months preceding the census, top five industries are agriculture, forestry and fishing (60.3%); wholesale and retail trade, repair of motor vehicles and motorcycles (11.7%); construction (9.4%); manufacturing (3.3%) and other service activities (3.3%) respectively.

39. **Employment status of economically active population:** Among 2,625,925 persons aged 10 years and above who performed any economic work in the last 12 months preceding the census, the highest number of people worked as own account worker (57.6 %), followed by employee (25.9%) and contributing family member (15.1%) and employer (1.3 %). Similarly, 0.1% people have not stated their employment status.
40. **Economically active population by institutional sector:** The household sector is the largest institutional sector with 65.2 percent of total 2,625,925 persons who worked in the last 12 months preceding the census. This is followed by non-financial corporation, government, financial corporation and non-profit institution serving households in the row with 30.1 %, 3.5%, 0.7%, 0.3% respectively, while 0.1% have not stated their institutional sector.
41. **Reasons for not being economically active:** Among the population aged 10 years and above who were economically not active (i.e., who did not perform any economic work), 47.5 percent reported being 'student' as the main reason for not working. Similarly, further reasons include: household chores (21.7%), aged (11.0%), family care (7.7%), disability/illness (2.5%), pensions/income (1.9%), social work/volunteer service (0.3 %) and other reason (7.1%).
42. **Birth registration status of children of age 5 years and below:** Of total 541,059 children of age five years and below, 72.0 % are found to have registered their birth and 28.0 % are still unregistered. Among the registered children, male children are 0.4 percentage points more than female.

Part II:

An introduction to the National Population and Housing Census 2021

1. Introduction

The census taking in Nepal dates back to more than a century. The National Population and Housing Census 2021 (NPHC 2021) is the twelfth decennial census since 1911 A.D. (1968 B.S.) - the first census taking year in Nepal. The four censuses before 1952/54 were simple head counts and they did not have qualities of modern census. But the fifth census conducted in 1952/54 utilized internationally comparable concepts, definitions and classifications as recommended by the United Nations. So it is considered as the first modern census of Nepal. The 1961 census was carried out by the Central Bureau of Statistics after its establishment in 1958 by the Statistics Act 1958. The 1971 census introduced Computer processing for the first time using IBM 1401. The 1981 census introduced questions on economic activities of individuals and maps for field work, and assessment of the quality of census enumeration began from this census. The 1991 census is the first census after the restoration of multiparty democracy and this census introduced, for the first time, collecting details of caste and ethnicity of individuals. The 2001 census introduced sample survey for some of the questions of census for the first time and two types of forms were used: one for full count and the other for sample counts. But the field work for this census could not be completed in 957 wards of 12 districts, due to effect of armed insurgency in the country, for which estimation methodology was adopted. This census introduced the use of modern GIS cartographic maps for the field work, gender friendly concepts, collection of detail socio-economic activities of women and data entry management by a private party. The 2011 census continued the earlier provisions except introducing an independent observation of census field work by civil society. Most noticeable feature of this series is that the whole census operation was almost funded by the domestic resources.

NPHC 2021 is the first national census conducted after the country embarked into federal system of governance formally. The salient features of NPHC2021 are the following:

- Adoption of full census enumeration for household and individual information unlike use of sampling in 2001 and 2011.
- As additional legal framework, introduction of Census Management and Operation Order, 2019 (2076 BS), Census Management and Operation Procedure, 2020 (2077 BS), and administrative management and financial standards for the census, 2019 (2076 BS) by the Council of Ministers, Government of Nepal.
- Introduction of e-census for government personnel working in the diplomatic missions abroad and their dependents usually residing there.
- Introduction of Computer Assisted Personal Interviewing (CAPI) technique using handheld digital device (Tablets).
- Mobilization of local unemployed educated youth for field enumeration and supervision recruited through competitive process unlike using school teachers in the previous censuses.
- Utilization of at least 50 percent female out of the total enumerators and supervisors.
- Extensive layers of trainers were employed at different levels of training including school teachers as master trainers at the district and local levels.
- Use of pre-coded questions.
- Use of additional form for a separate study on cause of death for maternal mortality conducted by the Ministry of Health and Population.
- Use of a community questionnaire to collect basic information for all administrative wards across the country.

- Full enumeration of all types of buildings including their use.
- Use of improved cartographic GIS maps for every Enumeration Areas.
- Adoption of extensive and self participatory communication strategy.
- Special emphasis was given for GESI (Gender Equality and Social Inclusion) and participatory census; as such slogan for the census is ‘My Census, My Participation’.
- Special press appeal released by rural and urban municipality associations, and federation of industry and commerce for the facilitation of census enumeration by their members.
- Establishment of a separate data processing center within the CBS premises.
- Coding and consistency of the questions were rechecked before data entry.
- Coders and data entry operators were freshly recruited through a competitive process and remunerated on key stroke basis.
- Ninety seven percent of the total cost was provided by the government from domestic resources.

**Inter-censal population changes
(1911 – 2021 A.D.)**

Census year	Population	Inter-censal changes	Inter-censal changes (%)	Annual exponential growth rate (%)
1911	5,638,749	-	-	-
1920	5,573,788	-64,961	-1.15	-0.13
1930	5,532,574	-41,214	-0.74	-0.07
1941	6,283,649	751,075	13.58	1.16
1952/54	8,256,625	1,972,976	31.40	2.27
1961	9,412,996	1,156,371	14.01	1.64
1971	11,555,983	2,142,987	22.77	2.05
1981	15,022,839	3,466,856	30.00	2.62
1991	18,491,097	3,468,258	23.09	2.08
2001	23,151,423	4,660,326	25.20	2.25
2011	26,494,504	3,343,081	14.44	1.35
2021	29,164,578	2,670,074	10.08	0.92

2. Organizational structure of NPHC 2021

- 2.1 CBS established 7 Provincial, 80 district and 349 Local Census Offices for the management of census activities of NPHC 2021. More than one district offices were established in districts with larger population, like Kathmandu-5, Lalitpur-2, Morang-2, Jhapa-2, Sunsari-2, Rupandehi-2, Kailali-2, while a Local Census Office covered two or three rural or urban municipalities. The provincial, district and Local Census Offices were coordinated by the Population Section under the Social Statistics Division of the CBS.
- 2.2 A National Census Steering Committee (NCSC) headed by honorable Vice Chair of the National Planning Commission (NPC) was formed that consists of a member of NPC, eight Secretaries of various ministries, heads of Statistics and Population Studies Central Departments of Tribhuvan University and Director General (DG) of the CBS as Member Secretary. The Steering Committee invited subject matter specialists and other distinguished personalities in the meeting. The NCSC, as the high-level advisory committee, issued overall policy directives on census undertakings and acted as the final arbitrator in resolving any impediments to successful completion of census enumeration.
- 2.3 National Census Coordination Committee (NCCC) headed by honorable member of the NPC was formed that consists of Secretaries of the Office of Chief Minister and Council of Ministers of seven provinces,

Joint-secretaries of six federal ministries, presidents of Federation of District Coordination Committee, Urban Municipality Association and Rural Municipality Association, and Deputy Director General of the CBS as Member Secretary. The committee has been instrumental for ensuring necessary facilitating coordination and cooperation at the federal, provincial and local levels in different stages of the census operation.

- 2.4 A Technical Committee headed by the DG of CBS was formed consisting of members from representative of most of the line ministries, statistics, economics and population studies professors. Representatives from some relevant development partners were also invited in the committee as necessary. The committee was mainly responsible for all the technical decisions which were later recommended to the census steering committee for final approval.
- 2.5 Six special thematic committees were formed to work on different subject areas. The six thematic committees were: a) Questionnaire Design and Data Analysis, b) Gender and Social Inclusion, c) Geographic Information and Cartography, d) Training and Publicity, e) Management Information System and Data Processing, and f) Monitoring, Evaluation and Quality Management. The thematic committees were headed by Deputy Director Generals of the CBS and comprise of members from the relevant sections of CBS and outside experts from academia and relevant ministries.
- 2.6 A Provincial Census Coordination Committee (PCCC) was formed to facilitate, coordinate and monitor census activities at the province level. The PCCC was headed by the Principal Secretary of the Office of Chief Minister and Council of Ministers and comprises of Secretaries of three provincial ministries, provincial police chief and provincial census officer as Member Secretary.
- 2.7 A District Census Coordination Committee (DCCC) headed by Chief District Officer was formed at each district consisting of members from main district level offices including the district police chief, representatives of political parties and District Census Officer as Member Secretary. The DCCC was mainly responsible for district level facilitation, monitoring, security management and coordination of census activities.
- 2.8 A Local Level Census Coordination Committee (LLCCC) headed by the Chief Administrative Officer was formed at each local level to facilitate the local census activities.
- 2.9 A Ward Census Facilitation Committee (WCFC) was formed at each ward headed by Ward Chair which was mainly responsible to provide assistance as required by enumerators and supervisors, and ensure completeness of field work.

3. Census questionnaire and other tools

Census 2021 is in fact three different kinds of censuses combined in one go. The Population Census, Building Census and Live-Stock Census are the part of Census 2021 though limited number of questions were included for the latter two topics. The following are the questionnaires and other tools related to the census 2021:

3.1 Building and Household Listing Form

The supervisors prepared a complete list of buildings and households about a month prior to the main census enumeration carried out by the enumerators. The Listing form contains questions for Building and Live-Stock Census. In addition, like in the previous censuses this form collected area of agricultural land operated by the household that was later used as a sampling frame for the Agriculture Census. All the buildings in the Enumeration Area (EA), whether they are vacant or not, were listed in the form and basic information like number of floors, year of construction, purpose of use, number of residential households, household members by sex including the other sex category, land used for agriculture, and households engaged in agriculture and livestock owned by households, residential buildings constructed with government grant, household members with bank accounts, household members with Technical and Vocational Education or Training, and information on households who have taken loans from any cooperatives, bank and financial institutions were collected through this form.

3.2 Main Questionnaire

Unlike in the previous two censuses where sampling was used, the NPHC 2021 is a complete census and the main questionnaire was administered to all the usual resident households in the country. The

questionnaire basically contains housing information and individual information part. The housing part contains questions about ownership of the housing unit, household amenities/assets used, households by female member's ownership of fixed assets (housing unit/land), non-agricultural informal enterprises operated by households and sex of main operator, deaths and causes, and details of absent members of households. The individual part of the questionnaire contains name of every member of the household, relationship to head, sex, age, date of birth, birth registration status of children aged 5 years and below, caste/ethnicity, languages (ancestors language, mother tongue and second language), religion, , country of citizenship, marital status and age at first marriage, type of disability, literacy and level of education, migration, fertility of women 15-49 years of age, employment status, occupation, industry, and living arrangement of children under the age of 18 years. Questions on literacy and level of education were asked to all persons aged 5 years and above. Similarly, questions on marital status, age at first marriage, and economic activities, occupation and industry of currently working were asked of those aged 10 years and above. For economic activities, for those who worked less than 6 months of economic work or did not do any economic work at all were asked why they did so and if they searched for any work part time or full time.

3.3 Community Questionnaire

Collecting basic socio-economic and infrastructure information from each ward was also part of the census operation. A separate questionnaire was administered to the ward chairperson or ward secretary by the supervisors at all the wards.

3.4 Enumeration Area (EA) maps

The Geographic Information System (GIS) section in the CBS constantly works on making EA maps by collecting and digitizing the geographic information on the field and delineate boundaries of EAs suitable for the purpose of the censuses and surveys conducted by the CBS. This section worked hard to produce EA maps for the census 2021 as well. For the purpose of census 2021, the EA maps were prepared such that about 100 to 160 households in Mountain, 170 to 200 households in Hill and 220 to 250 households in Tarai were covered in one EA. As such the wards of all the urban municipalities were divided into smaller areas to form EAs according to these criteria while in the case of rural municipalities the then wards that existed in the village development committee earlier (before the federal structuring) were treated as a separate EA. The formation of EAs as a mutually exclusive area helped conduct the census without omission and duplication and ensured completeness. The printing of the EA maps was a huge task requiring many months of computer works and printing. The GIS section tirelessly prepared and printed about 70,000 maps in high-quality high-speed printer at the office premises.

3.5 Digital form of questionnaire

Digital application for the Building and Listing Form and the main questionnaire were prepared in the CSPro platform that was later installed in tablets for the CAPI census in the selected local levels of Kathmandu district.

4. Basic concepts and reference date

4.1 Method of counting

Like in the previous censuses in Nepal, the Census 2021 also adopted "modified de jure" method in counting the population. Using this method, a person was counted at his/her usual place of residence. Usual place of residence is defined as a place where a person has been living or intends to live usually. If in any case a person cannot specify his/her usual place of residence, then the criterion of at least six months residence is considered. The permanent address or birth place or the legal migration is not considered for the purpose of census counting. A person who is absent from usual place for a short period for the purpose of treatment or pilgrimage or employment or similar reasons is treated as present in the usual place of residence. Persons away or absent from birth place or usual place for employment or study or business purpose for longer than six months' period is considered absent population and thus, not counted as present population. However, homeless or mobile population was counted at the place where they were traced on the last day of enumeration.

4.2 Reference date

The reference date for the NPHC 2021 is November 25, 2021 (Mangsir 9, 2078 BS). For questions related to death in the household, birth given by a woman of age 15 to 49 and work done by individuals, the last 12 months preceding the day of enumeration was considered as the reference period.

5. Human resource for the field work management

The human resource required for field work was recruited on the basis of merit and competency. For the first time in census history, the educational qualification for the enumerators and supervisors was upgraded by one level to 10+2 and bachelor's degree respectively as compared to requirement for the same post in previous censuses. An online Human Resource Management and Monitoring System (HRMMS) was designed and open application was announced two months before the field work and the applicants were selected on previously notified criteria. Locals and/or persons cognizant of the local language, women and candidates from caste/ethnic groups were as much as considered in selection. A total of 8,545 supervisors and 35,657 enumerators were selected from among the 50,000 and 150,000 applicants in the system respectively. The candidates selected from the system were recruited by the District Census Office after final verification of the credentials uploaded in the system. Besides field staff, a total of 1,800 school teachers were prepared as master trainers who were used especially in enumerators training, 87 District Census Officers for overall management of census at the district, 87 Deputy Census Officers, 349 Local Census Officers to implement field-level activities and about 100 central level staff were engaged in different phases of the census except 10 core-group staff at the center. All levels of census officers were taken from the pool of federal or local level government offices and priority was given to those who have prior experience of census/data collection work or deputed in local area. The work force was ever most inclusive, with participation of Caste/Ethnic groups, Dalits and persons with disabilities, and gender balanced with 50 percent females. Supervisor to enumerator ratio was 1 to 4 in the fieldwork.

6. Logistics management

The management of logistics for a huge task like census requires mainly procurement, storage and safe delivery to and from the field. This task is a huge challenge for a country with very difficult terrains, no regular transportation system and high cost. Maintaining the quality and cost effectiveness of materials to be procured in time is also an additional challenge given the time-bound and cumbersome public procurement process and guidelines.

6.1 Procurement of logistics

The logistics that were required in large numbers, for example, caps, bags, torch lights, ball pens, markers, stationery and printing of questionnaire and manuals were procured through competitive bidding process in the fiscal year preceding the census year. The laptop computers required for data processing were procured in the census year. Special quality of paper for printing of the questionnaire and cover page for binding of the questionnaire book was ordered keeping in mind the possibility of handling of the questionnaire by many hands in different stages in between dispatching from Kathmandu to receiving back, and during coding and data entry operations. About 58,000 bags; 58,000 caps; 55,000 torch lights; 82,000 red ball pens; 304,000 blue ball pens; 110,000 markers; 168,300 main questionnaire big book (containing 50 set of questionnaires); 51,100 main questionnaire small book (containing 20 set of questionnaires); 41,500 household listing form big book; 51,500 household listing form small book; 13,500 community questionnaire; 56,000 enumerator manuals; 13,000 supervisor manuals and 300 laptops for data processing were provisioned for the census. In addition, other materials like EA maps, District Census Officers manual, training manual, Gender and Social Inclusion manual, note books, record files, envelopes, letter pads, monitoring and supervision forms, sample questionnaire forms for the main questionnaire and household listing, request letter, brochure, pamphlets, stickers, posters, training exercise examples, training evaluation forms, pre-post training evaluation questionnaires, flex print of questionnaire, identity cards, experience certificates, maternal death notification forms, etc. were also procured or printed. All the District Census Offices, except those in Dolpa and Humla districts and other six having regular office vehicle, were provided with contracted out vehicles for two and a half months' period.

6.2 Census Warehouse, Storage, packaging and delivery of census materials

Census warehousing, storage, packing and delivery of logistics was also challenging. A separate building was rented nearby and a team headed by a Statistics Officer was deputed for this purpose. About 25 loaders and helpers were recruited for one year at the storage facility for overall physical handling of the materials like packing, lifting, storing, dispatching to and receiving from the field and the data center. Packaging of the census materials was done very systematically so that the census managers in the field did not have to spend much time in identifying the materials required for the purpose. So the training materials and field work materials were separately packed, listed and marked legibly. Similarly, the materials were packed separately for District Census Office and Local Census Office and marked clearly in the package. Whereas, for Local Census Office covering two or more local levels, the questionnaire books required were packed separately for the respective local level. Dispatching and delivering census materials to the destinations safely in time was also a challenging task of logistical management. The packed materials were transported from the warehouse at Kathmandu to the District Census Office through a contracted-out party which used different means of transportation. The District Census Office delivered the received materials to the Local Census Office under its jurisdiction. The pre-assigned team of enumerators and supervisor submitted the filled-in questionnaire to the Local Census Office. The Local Census Office thoroughly checked the submitted questionnaires and forms, packed them in the same way as had been packed originally, and delivered to the District Census Office. The District Census Office then delivered the materials to the storage facility in Kathmandu where EA wise thorough counting of the questionnaire was done to ensure completeness. The completed forms from Dolpa, Humla and Mugu districts were transported to Kathmandu by using helicopter. The team deputed at the warehouse systematically stored the received forms and questionnaire which eased the handling of questionnaires, including during data entry and verification process.

7. Communication and publicity

As pointed out in the organization and management of census order and procedural manual, all kinds of media were fully utilized for the communication of census messages and publicity. Special messages were transmitted through the landline and mobile phone CRBT facility. The Nepal Telecommunication Authority (NTA) coordinated with the national telecom service providers and their service during the field work period was appreciable. All national dailies, weekly papers, magazines, all TV channels, radios, also carried out census message to the public throughout the period of the field work. The transmission of census messages through various FM radios network encouraged the self participation of respondents and the messages especially in local languages was very effective. Radio jingles, posters, stickers, pamphlets for different target groups were also produced and distributed. A number of interviews, talk programs were also organized in the national television to disseminate the census messages and educate the respondents. Similarly, the official census website (<https://censusnepal.cbs.gov.np/>) was also utilized to provide the respondents and census staff an easy access to all census materials. Various caste and ethnic communities, cultural and religious groups, students and various professional and righteous organizations also acted voluntarily to communicate census messages.

A National Communications Expert, recruited by UNFPA, supported CBS for various census publicity and communications work, including media support and finalization of communications materials in line with the overall census publicity and communications strategy.

8. Field operation

The Building and Household Listing fieldwork was conducted by the supervisors for 20 days from September 15 to October 4, 2021 (*Bhadra 30 to Ashwin 18 of B.S. 2078*) and the main census enumeration was done by the enumerators for 15 days from November 11 to November 25, 2021 (*Kartik 25 to Mangsir 9 of B.S. 2078*). The supervisors closely supervised the main census fieldwork by the enumerators in the latter period whilst they also administered the community questionnaire from the wards assigned to them. The last day of the census enumeration was set aside for any adjustments due to newly occurred birth or death in the EA.

The Building and Household Listing field work and the main enumeration periods were originally scheduled for the period of May 9 to 28, 2021 (*Baisakh 26 to Jeth 14, 2078 B.S.*) and June 8 to 22, 2021 (*Jeth 25 to Asar 8, 2078*) respectively.

Following the original schedule, the Provincial/District Census Office was established for 4 months on March 14, 2021 (*Chaitra 1, 2077 B.S.*) and the Local Census Office was established for 3 months on April 14, 2021 (*Baisakh 1, 2077 B.S.*). But due to the appalling situation caused by the COVID 19 pandemic, all the field programs of the census were postponed by the government until further notice when the supervisors training was on the final day of completion. The revised schedule was later approved when the government lifted lockdown after the pandemic subsided and the census work resumed with supervisor's refresher training nearly after 5 months.

9. Data Processing

- 9.1 Data processing for the NPHC 2021 was done within the CBS premises. The three storey building at the rear side of the CBS premises was renovated and equipped with basic facilities and functionalities like local server, LAN, security cameras, furniture, air conditioner to use as a separate data processing center. The three storeys of the building were utilized for data entry while the ground floor of the main building was used for coding of the paper questionnaires.
- 9.2 The census 2021 questionnaire was fully pre-coded except some provision for recording responses with texts. The CBS recruited 100 coders and 300 data entry operators through a competitive recruitment process. The coders were remunerated according to number of households validated while the data entry operators were remunerated on key stroke basis. The coders validated the codes assigned during the field work by the enumerators and checked for consistency across different parts of the questionnaires before data entry. A separate manual for coding, editing and data entry was prepared and the coders and data entry operators were trained before assigning to actual work. The coding and data entry was managed in two 6-hours morning and day shifts. The coding and data entry activities were closely supervised by 25 supervisors hired temporarily while the overall activities were monitored and controlled by the members of the core census team specially deputed to the dedicated shifts.
- 9.3 The data capturing application was prepared in CSPro, an integrated software platform developed for data entry, editing, verification and tabulation by US Census Bureau, was used for data processing (Key entry, editing and verification). The android version of the same was used for preparing the CAPI application to be used for Tablets. The individual information obtained from e-census was also converted to CSPro format in order to incorporate the records to the database.
- 9.4 The data entry application was fully built-in with range and consistency checks programs and the entry operators were instructed to run the program and make the necessary changes before transferring the data to the server. The consistency checks were done thoroughly during the whole processing operation. The CSPro, SPSS and STATA were used for tabulation of the data. The raw data was further edited and imputed with the consultation with national and international data processing experts.

10. Quality management

Realizing that chances of non sampling errors to creep in may be high in case of any mammoth data collection activity like census, various precautionary measures were adopted during the pre-census, during-census and post-census phases. The following activities were in place to enhance the quality of overall data:

- 10.1 National, provincial and district level consultation and roundtable workshops with various stakeholders and data users were carried out to collect user demands and suggestions before finalizing the census tools (questionnaires and manuals).
- 10.2 The questionnaires and manuals were revised and peer-reviewed by the subject matter specialists, language experts and GESI (gender and social inclusion) experts to make the tools more respondents and users friendly including people with disabilities, sexual minorities, women, elderly, ethnic communities.
- 10.3 National and provincial level master trainers were prepared to maintain uniformity and quality in training in different layers. The provincial master trainers, who were taken from the pool of local secondary level school teachers, especially facilitated the enumerator's training at the Local Census Office. In addition to have provision for master trainers, master-slides containing the main messages to be delivered were designed to facilitate the trainers for the uniform delivery of the training

sessions. Pre-training and post-training tests with multiple choice questions were administered for the assessment of the training participants at each level. The training sessions evaluations forms were also designed to assess the quality of training sessions, trainers, and overall training management.

- 10.4 Ward level census facilitation committee were formed at each ward in order to ensure complete enumeration and to provide the necessary support to the census fieldworkers.
- 10.5 A vehicle was provisioned for the District Census Office for closely and timely monitoring of the field work and maintain quality.
- 10.6 A mobile application was designed that was used by the supervisors during the household registry phase and the enumeration phase for daily reporting of progress.
- 10.7 A help desk at the CBS central office was established that provided support to the field work with a dedicated toll-free hotline. Besides, existing social networking platforms were also used by the central and District Census Offices to provide assistance and disseminate new urgent guidelines to the field staff. An official census website was also used to receive suggestions/complaints of any omission/duplication of households throughout the field operation period to ensure the wider participation of the respondents.
- 10.8 The respondents were informed during the enumeration phase by the provision of CRBT (Caller Ring Back Tone) to all the mobile phone holders. The messages played on the phone helped enumerators provide the truthful information and supported the **“No Omission, No Duplication”** policy as well. Similarly, wide range of mass media and publicity materials were circulated that helped enhanced the census 2021 slogan **“My Census, My Participation”** and wider participation.
- 10.9 A **“Form Reception Desk”** with dedicated team was set up at each Local Census Office to receive the questionnaire from the enumerators and supervisors. The team reviewed the completed questionnaires to check if the enumerators had cleanly filled up the questionnaire and provide feedback to rework if necessary.
- 10.10 To minimize errors during the data entry phase, the computer entry application was built-in with minimum and maximum range checks and other programs to validate the consistent relationships among the questions and the operators were closely monitored.
- 10.11 The respondents were massively contacted through telephone during the coding, data entry and validation stages for the clarification of any doubts.
- 10.12 UNFPA in collaboration with the Central Department of Population Studies/Tribhuvan University organized census observations in different local levels spanning in every province of the country. The training, fieldwork and office management were observed for both paper-based and tablet-based enumeration. The rapid feedback received by CBS census team from the independent observation was useful to addressing some of the challenges and trouble-shooting during the fieldwork.
- 10.13 A Post Enumeration Survey (PES) was conducted in early March 2022 by an independent agency from Tribhuvan University (Labor Studies Program) through a G2G (Government to Government) agreement between the two agencies. The findings of the PES that has measured coverage and content errors will help assess the quality of the census data.

11. Census results and related products

11.1 Preliminary census results

The preliminary results of census 2021 were released in January 2022, after about 60 days of the final day of enumeration in November 2021. The preliminary census results were based on the summary sheets (control forms) filled in by the supervisors/enumerators in the field. The total number of households and population in the preliminary counting were 6,761,059 and 29,192,480 respectively. There has been negligible discrepancy between the preliminary and the final results which is mainly due to the fact that the final results have been prepared by scrutinizing the main questionnaire in detail while the preliminary results were based on quick counts from the summary sheets.

11.2 Final census results

The final result of the census is planned to be released in different phases. Major information, such as number of houses and households, age and sex-wise population and other important demographic characteristics up to the lowest administrative area i.e. Ward have been released in the first phase. The following statistical reports have been released in the first phase:

- i) National report-1
- ii) Provincial reports that incorporate districts and local levels -7
- iii) Urban Rural report-1
- iv) Brief census report in Nepali

11.3 Other statistical reports

It has been planned that the subsequent volumes, that will be released soon, will cover the remaining information from the household listing, main questionnaire and community questionnaire.

11.4 Thematic reports

Apart from statistical reports, a number of thematic reports on different census topics will be produced which will be a kind of analytical report containing detail analysis of the census data triangulated with other available relevant information. Based on users' feedback and also observing good practices in other countries, for the 2021 census, the CBS plan to publish one report for each thematic topic. The collection of the theme specific reports is expected to replace the Population Monograph that the CBS had been producing traditionally in the previous rounds of the censuses. The idea is that the separate thematic reports will be user-friendly, contain deeper analysis to generate more nuanced information on policy implications. The CBS will engage national authors from the academic community and policy experts. Both national and international reviewers will technically support the thematic analysis for quality assurance purposes to international standards.

11.5 Digital data file

After having released the final census results of all the characteristics, it is planned to make available Public Use Micro-data (PUM) file in the usable format. The digital PUM is expected to benefit the academia, researchers and other practitioners.

11.6 Dissemination of results and census data literacy

The statistical and thematic reports will be disseminated at the Federal, Provincial, District and Local level as much as available in printed and digital format. The printed copies will be distributed on First Come First Served basis and some for prioritized users from the government and universities. The digital copies will be made available in the NSO website (www.cbs.gov.np) and census website (censusnepal.cbs.gov.np). The area specific census results and related reports can be accessed through digital medium by the public on the day of final release (censusnepal.cbs.gov.np/results). Census data literacy and dissemination programs are planned at the federal, provincial and district levels covering users from the local levels, researchers and academia.

12. Cooperation of international development partners

- 12.1 Development partners especially from UN organizations are very supportive of the census process and are very much appreciated. The UNFPA and UNWOMEN were very generous to provide technical and logistics support to the census. The UNFPA organized the Envisioning Census 2021 program at the very beginning planning stage in August 2018 and supported the preparation of Census Project Document (CPD) which was approved by the National Planning Commission. The UNFPA's support in collaboration with the Central Department Population Studies/Tribhuvan University for the census consultations and sensitization workshops that were undertaken with a range of stakeholders at national and provincial level on the importance of the census, and the utilization of census data for the SDGs have been noteworthy. The IT equipment provided by the UNFPA has strengthened the CBS's infrastructure and capacity, and complements its efforts to modernize the census operation through a multi-method

approach of data collection, including the digital census (CAPI) in the selected local levels of Kathmandu district. Likewise, the Human Resource Management and Monitoring System (HRMMS) prepared by the UNFPA's assistance was a game changer in solving the intricacies of recruitment process of field staff that had been the main burden for District Census Offices in the earlier censuses. The UNFPA has been continually supporting capacity development programs and study tours which helped census staff learn good practices and skills.

The UNWOMEN provided technical support to prepare the GESI friendly training and communication materials, including: leaflets, brochures, audio and video PSAs in different local languages. Other technical support provided by the UNWOMEN are the development of training video, training manual, training slides and GESI manual.

The development partners are welcome to provide generous support especially for the local-level results dissemination, thematic analysis and capacity development programs.

13. Challenges faced during the census operation

13.1 Impact of COVID-19

The main challenge to be faced was conducting census activities amid threat to life for respondents as well as field staff from the COVID 19 pandemic. But the provision of face mask, face shield and hand sanitizer to the field staff helped boost their will-power and a sense of security to the respondents as well. The COVID also caused uncertainty among census managers particularly at local and district level. The postponement of census activities caused cost over-run of field-based offices established for the census.

13.2 Use of multi-mode data collection simultaneously

Three modes of data collection namely paper based, computer-based CAPI and web-based e-census were simultaneously launched to collect data. This was like conducting three censuses at the same time and management of the activities required for each of them, which were of different and independent nature, with limited human, technical and financial resources, was in fact a great challenge.

13.3 High expectation of users from the census

There have always been huge demands for more questions to be included in the census questionnaire. The demand has become more pronounced in census 2021 in the context of federal structure of governance and raised expectation of the public after the new constitution. The decennial population census is also under pressure to include more questions in the absence of well-organized and regular survey and administrative record processing and data flow systems system to supply data demanded for wider use. The questions that are included were finalized based on several rounds of discussions and feedback from stakeholders and testing. However, the number of questions could not be reduced and had to incorporate more than 55 questions in the main questionnaire. This added respondent burden to some extent and it was a great challenge to monitor and enhance the quality of field work. The quality of data would not have been at its present level had the respondents not cooperated very well and the enumerators not kept patience while conducting field work.

13.4 Collecting information from respondents in highly urban areas

The respondents in the highly urban areas are naturally busy and away from home for employment. In case of nuclear family, the house was even locked during the day time. So choosing an appropriate time to make an appointment with them for collecting information was challenging. People have security concern in highly urban areas and it was a challenge to build their confidence especially if the enumerator is not very familiar to the area. But through the massive airing of the census sensitization messages this was overcome and most of the respondents participated in the census.

13.5 Pressure from interest groups

People's aspirations and expectations have been elevated by the new Constitution. Issues of identities and capturing government's attention are high. As a result, some interest groups tried to manipulate the respondents' independent answers and dictated the enumerators to write a particular response. But

this was independently verified and a press note was released from the CBS notifying all the concerned parties for possible legal action if they did not cease campaigning with prejudice. Moreover, a number of interest groups especially related to caste/ethnicity, religion and language have shown serious concern on census results and presented their specific demands which need to be dealt with higher government or political level.

13.6 Meeting users' expectation of census data

There has always been a comparison and confusion with the voters list and census data. These two actually serve different purpose so they have different concepts. The voters list is prepared on the basis of permanent address and in order to be included in the voters list one should have either acquired citizenship certificate from that place or migrated legally to that place. But in practice the people may be living somewhere and their voters list may be anywhere. They can just come for voting and may or may not usually live there. But the purpose of census is to know the number of actually living current population of a place to manage physical amenities, and economic, educational, health and other facilities for them. So the census in Nepal is carried out in "Usual Residence" basis. The usually residing population may have their permanent address or birth place or voter name anywhere other than they are usually living. Also, it is not necessary to show legal residency status to be included in the census. So the data from census and voters list do not match and the users should take this into account and use the figures with caution.
