PREFACE

The availability and accessibility of social statistical data are instrumental to the development and implementation of the policies can help for the achievement of national and local objectives. However, these data are not easily available in one place when we want it. So Ministry of Women Children and Social Welfare has been trying to compile some social statistics in one place. This publication piles the data from the different secondary sources and covers information on women, children, senior citizens and persons with disabilities.

As this is the collective and collaborating effort of the concerned offices of the ministry and its stakeholder agencies. I would like to thank who have contributed in bringing out this publication.

Finally, we welcome suggestions from the users of this publication for the future improvement.

Dhana Bahadur Tamang
