Message

It is my great pleasure to present the Annual Report of Rapti Provincial Hospital for the Fiscal Year 2082/083. This report summarizes the performance of all hospital departments and serves not only as a reflection of the current state of our health services but also as a foundation for evidence-based planning and continuous improvement. I am confident that the information provided in this report will be invaluable to the Government of Nepal, the Provincial Government, and External Development Partners (EDPs) in guiding the future development and expansion of our hospital's activities.

The report provides a comprehensive overview of the hospital, including details on physical infrastructure, current human resources, health services, hospital statistics, and the challenges faced in service delivery. I feel proud that we are working with a competent and efficient healthcare system, and the data included in this report are up-to- date and accurate.

This report was made possible through the dedicated contributions of many individuals, especially Consultant Surgeon **Dr. Shishir Pokhrel** Medical Recorder Supervisor **Mr. Balkrishna Pandey,** IT Expert **Mr. Khum Raj Kc** and Hospital Management Officer **Ms. Sangita Acharya** for their valuable roles in data collection, report design, and formatting. I extend my heartfelt thanks to all hospital staffs for their unwavering dedication and hard work, without which this report would not have been possible.

Furthermore, I would like to express my sincere gratitude to the Lumbini provincial Government, Tulsipur Sub-Metropolitan City, local agencies, the Hospital Development Committee, and our political leaders for their continuous support and valuable contributions toward the improvement of hospital services.

.....

Dr.Mohamad Nurul Hoda
Chief Medical Superintendent
Rapti Provincial Hospital

Introduction

Rapti Provincial Hospital, located in Ward No. 5, Naminagar, Tulsipur Sub-Metropolitan City, Dang, is situated near the Babai River and covers an area of 6 Bigha and 17 Kattha. The hospital was originally established as a Health Post in 2033 B.S. It was upgraded to a Primary Health Care Center in 2054 B.S. and subsequently expanded into Rapti Zonal Hospital in 2065 B.S. Finally, in Poush 2075 B.S., it was officially designated as Rapti Provincial Hospital by a decision of the Cabinet of the Government of Lumbini Province.

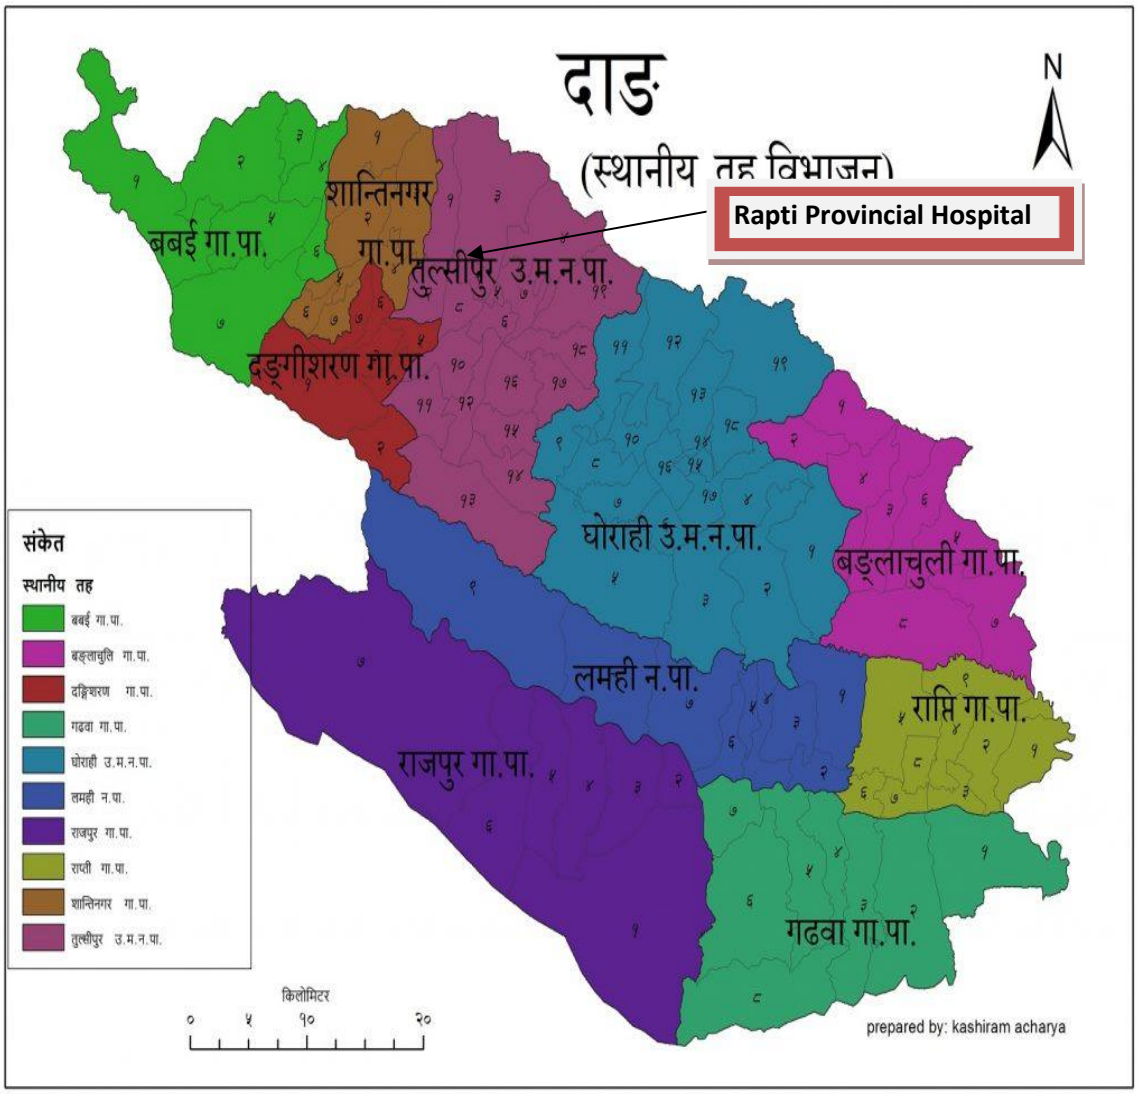

Dang District lies within Lumbini Province and is home to the largest valley in Asia, the Dang Valley. The district covers an area of 2,955 square kilometers. Dang comprises two sub-metropolitan cities, one municipality, and seven rural municipalities. It is bordered by Salyan, Rolpa, and Pyuthan to the north; India to the south; Banke to the west; and Arghakhanchi and Kapilvastu to the east.

As per the Cabinet decision of the Government of Nepal dated 2065/03/20 B.S., the hospital was upgraded to a 50-bed hospital. However, with the support of the Lumbini Provincial Government and the Hospital Development Committee, the hospital currently operates a total of 141 beds.

FCHV	1		1	100	0	
Total	1092	989	2081	52	48	

Minimum Service Standard

Major Activities of FY 2082/083

- **Burn Ward:** Established and operational a dedicated burn wards to provide specialized care and treatment for burn patients.
- **OPD Extension:** Extension the Outpatient Department (OPD), including additional space for billing and OPD services, to improve service delivery.
- **Isolation Ward for Nipa Virus:** Established a dedicated isolation ward to facilitate the management and infection prevention and control of suspected or confirmed Nipa virus cases.
- **Human Resource Strengthening:** Recruited an IT Expert and a Physiotherapist to strengthen hospital services and technical capacity.
- **Optometric OPD:** To provide basic eye checkup and treatment.
- **Physiotherapy Department:** Established and initiated physiotherapy services to provide rehabilitation and supportive care to patients.
- **Ultrasonography Service:** Added one Ultrasonography (USG) machine to strengthen diagnostic services and improve access to imaging facilities.

Challenges of FY 2082/083

1. **Physical Infrastructure**
    - Lack of Post-Mortem Room with a Mortuary.
    - Lack of Modular Operation Theatre (OT).
    - Mesu Quarter
    - Inadequate residential quarters for doctors, nurses, paramedics, and other staff.
2. **Human Resources**
    - O&M survey for the proposed 200 bedded hospital
    - Shortage of Biomedical Technicians, Gynecologists, Anesthesia Assistant, Dental Hygienists, Physiotherapist, Lab Technologist, Pharmacy Assistant/Officer
    - Inadequate number of paramedical staff.

3. **Tools and Equipments**
    - **Hemodialysis:** Need additional Hemodialysis Machine
    - **CT scan:** The hospital does not have functional CT scan facility.
    - **C-Arm:** The hospital does not have proper functional C-Arm machine.
    - **Power Backup:** Needed a 200–250 KV generator for adequate power backup.

Major Prioritized Activities

S.N.	Prioritized Gap	Action step to be taken to fulfil the Gap
1	OPD screening counter	Manage manpower
2	Physiotherapy service	Manage manpower
3	Social Audit	Conduct Social Audit by third party
4	BMET for repair and maintenance	Manage manpower
5	ICU establishment	Need 6 Doctors, 12 SN & 4 admin staff
6	Auctioning of old logistic	Process for Auctioning
7	Ambulance Service	Process for Ambulance purchase
8	Proper Post/Mortem Room with a Mortuary	Manage Manpower, Process for Department Management
9	Bed Upgrade	Manpower & Building
10	Modular Operation Theater (OT)	Looking from Lumbini Province Government
11	Residental Quaters	Looking from Lumbini Province Government
12	Power Back Up	Looking from Lumbini Province Government
13	CT Scan Machine	Looking from Lumbini Province Government

Radiation Burns
Caused by overexposure to radiation
X-rays or other types of radiation used in medicine are involved
Mostly seen in cancer patients using radiation therapy
Includes severe sunburns because UV waves are considered radiation
