Acknowledgement

A 37 year old female presented to the hospital with a history of pain abdomen and vaginal bleeding after amenorrhea for 2 months was diagnosed with suspected ectopic pregnancy. Emergency exploratory laparotomy revealed ectopic pregnancy in the left ovary with significant hemoperitoneum. Timely intervention despite the unavailability of advanced setup in a rural setting saved a life. Ovarian ectopic pregnancy is a rare entity constituting 0.5-3% of all ectopic pregnancies.

We wish to acknowledge the invaluable insights gained from the case study of a rare ovarian ectopic pregnancy. This case has enriched our understanding of this uncommon condition and highlighted the importance of early diagnosis and intervention in rural settings. The collaborative efforts of the medical team in managing this complex case underscore the critical role of teamwork and expertise in achieving successful outcomes.

We extend our heartfelt gratitude to all those who have supported and contributed to this work. Our deepest appreciation goes to the healthcare professionals and community workers in rural Nepal, whose dedication and resilience have been instrumental in providing essential medical services in challenging environments. Their unwavering commitment to improving healthcare access and outcomes in remote areas has been a source of inspiration and learning.

.....

Dr Laxman Khadka
Medical Superintendent
Pashupati Chaulagain Memorial Hospital

Introduction

Pashupati Chaulagain Memorial Hospital is Situated in Charikot, the headquarter of Dolakha district and 133 kilometers northeast of Kathmandu, the capital city of Nepal. This hospital is dedicated to continuous patient care and service. The roots of this hospital were planted in 2031 BS as Dolakha Health Centre which was later promoted as Charikot Primary Health Care Centre in 2065 BS and finally, after the mega earthquake of 2072 Baisakh, it was converted to an Emergency Hospital with Surgical Facility in collaboration with Medicines Sans Frontiers, Belgium which provided economic and technical support. On Magh 5th 2072, an MOU was signed between the Ministry of Health and Nyaya Health Nepal INGO to provide health service 50 bedded hospital with a consultant visit facility. In 2077 Kartik 15, Nyaya Health Nepal terminated the MOU with prior notice raising the financial issue then Bhimeshwor Municipality took the ownership and governance of this hospital.

In the fiscal year 2077/78, the Ministry of Social Development, Bagmati Province owned ownership of this hospital as a Provincial hospital on Falgun 13, 2077 as stated by the Cabinet of Ministers of Central Federal Government on Mangsir 18, 2077. Then after this hospital got approval for 50 beds to run for regular services. The new hospital structure and organogram of this hospital have been approved by the Office of Chief Minister and Council of Ministers, Bagmati Province in 2080/09/03.

Since this hospital is located in the headquarter of Dolakha, this is a secondary referral centre for the entire district, it is a challenge to provide service for around 400 patients per day on average. Besides it is a great deal to manage healthcare workers, security personnel, and administrative staff and provide them with salary and incentives which has drained the funds in the hospital development committee to zero level. However, by various means and resources was free, and health care was provided continuously till Poush 2079.

Aim of the Hospital

- ✚ To improve access to health care and enabling environment to reach underserved Communities in Dolakha with WHO Recommended guidelines to build a robust Government Health care System and Provide Quality Health Service with Free of cost.

Objectives:

- ✚ Enhancement in specialty services
- ✚ To Start endoscopy service, Dialysis service
- ✚ Provide regular health training to hospital staff on WHO Recommended treatment to enhance the participation of the public in hospital development.
- ✚ To make feel local government responsible for hospital services.

Fig: Catchment area of Pashupati Chaulagain Memorial Hospital

Pashupati Chaulagain Memorial Hospital is the only Province Hospital of Dolakha. So it is the referral site of other health institutions like Female Community Health Volunteer, Health Post, Community Health Unit, Municipal Hospitals and Basic Health Post

According to Nepal Constitution 2072 Health care service is free service and we have been providing free health care service for the past 7 years with the Support of Nyaye Health Nepal. During that period, we were able to provide free services to more than about five lakhs.

At present Pashupati Chaulagain Memorial Hospital Operates the Health Ministry of Bagmati province, Bhimeshwor Municipality, Health Office Dolakha and Female Community Health Volunteers to improve access to health care services. The FCHV

integrated with Hospital-based care via the Hospital's own Electronic Health Record (EHR) network/system. This Approach is also to create an enabling environment to reach underserved Communities in Dolakha with WHO Recommended guidelines to build a robust Government Health care System.

Although The constitution of Nepal envisages free health care, due to financial constraints, the Hospital facility operational Management committee decided to provide Quality health service at a minimum fee but despite that safe Motherhood programme is a free health service. At present hospital is Treating more than 150 patients per day for minimum cost.

Hospital Services

Like most primary healthcare facilities as well as Specialized Services, Pashupati Chaulagain Memorial Hospital provides all the necessary health services to meet the diverse needs of our communities. These services include:

- Inpatient with HDU Department
- Outpatient Department
- Surgical & Emergency care
- Lab services
- X-Ray & ultrasound services
- HIV, TB, Safe Motherhood, etc.
- C-section, ultrasound, family planning methods, postpartum counseling
- General surgery, orthopedic surgery & lab services focused on risk and complications assessment
- Outpatient services for chronic diseases & outpatient mental health services
- Lab investigations for chronic diseases
- Pharmacy
- Dental Service
- Physiotherapy, Mortuary and Ambulance services
- Oxygen plant

Human Resource

At present, there are 96 employees in this hospital including Physician, Surgeon, Anesthesiologist, Orthopaedical, MDGP Consultant, Medical officer, Nurse, Paramedics, Radiographer, lab technician, biomedical equipment technician, medical recorder and office assistant. Apart from the Permanent post, the management of the employees has been done by the hospital management committee, Bagmati Province Health Ministry and Nick Simon Institute.

OCMC service

Gender-Based Violence (GBV) is a global challenge and is affecting 1 in 3 women in their lifetime. GBV mainly includes physical and domestic violence, rape, mental torture, child marriage, and human trafficking. There are very few specific programs to address GBV in Nepal and the One-Stop Crisis Management (OCMC) program has been started Pashupati Chaulagain Memorial Hospital since 2014/15, with promising support in addressing gender-based issues.

Out of 750 cases over last 5 years, 695(92.7%) were female, 272(36.2%) were sexual assault cases followed by 259 (34.5%) of physical assault most women age group of OCMC victims were 15-49 years (73.6%) and most commonly affected ethnicity group among janajati (40%) and Brahmin/Chhetri (39.5%). Almost total victims 15% had some form of disability. Twenty-one women had difficulties finding safe homes and 7 women committed suicide. In the year 2080/081, 26 cases were sexual assault, 29 cases were physical assault and 18 cases were domestic violence

Electronic Health Record

All of our services are underpinned by the enrollment of patients in our integrated Electronic Health Record. All Health-Related indicators are recorded through Electronic Health Record. This has helped the hospital to become paperless and Helped in Generating data in fast track.

Fig: EHR system in hospital

Challenges:

Trained human resources.

- At the beginning this hospital was providing free health services – OPD, In patient, Operations, Laboratory services, Dental services, Imaging and diagnostic imaging with financial support of Nyaye Health Nepal. Budgeting, Hospital management, logistic, human resources, and other services including academics was running through the Nyaye health Nepal in collaboration of Nepal Government with understanding of MOU Agreement. Now days this hospital is providing services as per government rules and regulation. And now days Patients still hope for free, quality health services. But at moment we are not being able to meet their expectations. Our major challenge is to meet their expectation and provide quality specialty service to them.

Social service Unit

Social service unit has been established in this hospital from the FY 2080/081 as per 'Social Service Unit Establishment and Operational Guidelines, 2069' are enacted to facilitate the above tasks and to update the 'Social Service Unit Establishment and Implementation Guidelines, 2067 for the poor, helpless and the target group.

Altogether 396 people avail of hospital services from SSU in FY 2080/081, out of which 9 people were from marginalized/ endangered group, 148 were helpless, 48 were disabled, 70 were senior citizens, 15 were prisoners and remaining 103 people were deprived emergency citizens.

Target Group	Number		
	Female	Male	Total
Marginalized/endangered group	४	५	९
Helpless	९२	५६	१४८
Person with Disability	२०	२८	४८
Senior Citizen	३३	४०	७०
Prisoners	०	१५	१५
Deprived emergency patients	५३	५०	१०३
Total	१८३	१६७	३५०

Health Insurance Program

Health insurance program has been implemented in this hospital from 2079/10/01 as a priority programme. The health insurance program is an important social security program brought by the government under the concept of providing financial protection for risky advance unplanned expenditures incurred in the course of health service utilization. Social Health Security was launched in 2072 with the objective of providing accessible quality health services to all Nepali citizens and improving health service consumption on the basis of Social Health Insurance. The program hopes to play an important role in achieving the 2030 Summit Development Goals in moving Nepal towards achieving Universal Health Coverage (UHC). The Constitution of Nepal guarantees free access to basic health care and social security.

In the year 2080/081, 3556 people got services from this hospital under health insurance programme.

Hospital pharmacy

Nepal has promulgated the Drug Act 1978, to prohibit the misuse or abuse of medicines and allied pharmaceutical products as well as false or misleading information relating to efficacy and use of drugs and to regulate and control the production, marketing, distribution, export, import, storage and utilization of those drugs which are not safe for the public use, efficacious and of standard quality. To implement & fulfill the aim and objectives of Drug Act 1978 and various regulations are made under it. With this vision Pharmacy has been established in this hospital.
