Guidance Notes on the Use of The Standard Bidding Document

This Standard Bidding Document for **Procurement of Goods**, has been prepared by Government of Nepal (GoN), Public Procurement Monitoring Office (PPMO) to facilitate Single-Stage: Two-Envelope Bidding Procedures used for the procurement of Goods through **International competitive bidding (ICB)** procedure and is applicable to all the Public Entities as defined in Public Procurement Act, 2063.

These guidance notes have been prepared by the PPMO to assist a Procuring Entity in the preparation of Bidding Document, using the Standard Bidding Document, for the procurement of Goods and Related Services. Guidance notes in the Standard Bidding Document within the left square bracket and right square bracket should be deleted.

This document has 8 Sections, of which Section 1 (Instructions to Bidders) and Section III (General Conditions of Contract) must not be altered or modified under any circumstances. The Invitation for Bid (IFB) is a copy for advertisement that provides relevant and essential information to help the Bidders to decide whether or not to participate in the particular bidding process; this is provided in the Biding Document for information only.

The way in which a Procuring Entity addresses its specific needs is through the information provided in the Bid Data Sheet (BDS) and the Special Conditions of Contract (SCC) as well as in the detailed requirements of the procurement in the Schedule of Requirements.

This Standard Bidding Document, when properly completed will provide all the information that a Bidder needs in order to prepare and submit a bid. This should provide a sound basis on which a Procuring Entity can fairly, transparently and accurately carry out a bid evaluation process on the Bids submitted by the bidders.

The Procuring Entity, before publishing the Invitation for Bids, should identify and approve from the competent authority the procurement requirements, its technical features, and cost estimate. Furthermore, the Procuring Entity should keep in mind the availability of the budget and possible slicing and packaging of the procurement requirements.

If any amendments on Public Procurement Act 2063 or Public Procurement Regulation 2064 are made, the Procuring Entity shall incorporate such amendments when preparing a particular Bidding Document.

The following briefly describes the Sections of the Standard Bidding Document and how a Procuring Entity should use these when preparing a particular Bidding Document.

Section 1. Instructions to Bidders (ITB)

This Section provides relevant information to help the Bidders to prepare their Bids. Information is also provided on the submission, opening, and evaluation of Bids and on the award of Contract.

The Instructions to Bidders (ITB) specify the procedures that regulate the bidding process. The ITB contain standard provisions that have been designed to remain unchanged and **to be used without modifying their text**. The ITB clearly identify the provisions that may need to be

specified for a particular bidding process and require that such specification be introduced **through the BDS**.

This Section also contains the criteria to be used by the Purchaser in order to determine the responsive bid closest to the Average Bid Price and the qualifications of the Bidder to perform the Contract.

The Instructions to Bidders are not a Contract document and, therefore, **are not a part of the Contract.**

Section II. Bid Data Sheet (BDS)

The Bid Data Sheet (BDS) contains information and provisions that are specific to each bidding process. The Purchaser must specify in the BDS only the information that the ITB request be specified in the BDS. All information shall be provided; ***no clause shall be left blank***.

To facilitate the preparation of the BDS, its clauses are numbered with the same numbers as the corresponding ITB clauses. This Guide provides information to the Purchaser on how to enter all required information, and includes a BDS format that summarizes all information to be provided.

Section III.Evaluation and Qualification Criteria (EQC)

The purpose of the Evaluation and Qualification Criteria (EQC) is to specify the criteria that the Purchaser will use to evaluate the Bids to determine substantially responsive bid closest to the Average Bid Price. The Procuring Entity shall prepare the EQC by taking into account the nature, quantity, and or amount of the procurement and its related services and include it as a part of the Bidding Document. In determining the Evaluation and Qualification Criteria, the Procuring Entity should not limit the competition or make onerous criteria.

The EQC is not a part of the Contract document.

The Procuring Entity shall specify the evaluation criteria as specified in this Section. The Qualification Requirements shall be specified by Procuring Entity without any substantial deviation.

Section IV. Bidding Forms

This Section provides the standard format for the Bid Submission Form, Bidder's Information Form, Financial Situation Form, Average Annual Turnover Form, Financial Resources Form, Pending Litigation Form, Specific Experience Form Price Schedule, Bid Security Form and the Manufacturer's Authorization Letter to be submitted by the Bidder.

In the case of Price Schedule, the Procuring Entity shall fill the column 1 item and column 2 descriptions of Goods and related services in accordance with Schedule of Requirements.

This Guide helps the Purchaser and Bidder to fill in all the required information in the Price Schedule Form.

Section V. Schedule of Requirements (SR)

This Section provides the information on the List of Goods and Related Services, Delivery and Completion Schedules, Technical Specifications and Drawings. The Procuring Entity must carefully prepare this section for each object of procurement.

The Schedule of Requirements (SR) shall provide sufficient information to enable Bidders to efficiently and accurately prepare Bids that are realistic and competitive. The SR is a part of the Contract document and, therefore, The Purchaser must prepare the SR and include it as a part of the Bidding Document.

The SR should be complete, precise, and clear. An incomplete, imprecise, or unclear SR may prompt Bidders to require clarifications from the Purchaser or to submit conditional bids that may be based on different understandings of the Purchaser's requirements. Depending on the nature of the clarifications, the Purchaser may need to amend the Bidding Document and eventually to extend the bid-submission deadline. Conditional bids would lead to the rejection of Bids. Bids that are not comparable cannot be evaluated.

The Procuring Entity shall assign experienced staff to draft the SR in a manner permitting the widest possible competition, while at the same time clearly specifying the required standards of workmanship, the characteristics of materials and performance of the Goods, and the delivery and completion of the Goods and Related Services. Only by following this approach will ensure that the objectives of economy, efficiency, fairness, and transparency in procurement can be realized as envisaged under International Competitive Bidding (ICB) procedures.

Section VI. General Conditions of Contract (GCC)

The GCC contain standard provisions that have been designed to remain unchanged and **to be used without modifying their text**. This Section provides the General Conditions of Contract that will apply to the Contract for which the Biding document is issued. The GCC clearly identify the provisions that may normally need to be specified for a particular bidding process and require that such information be introduced **through the SCC**.

Section VII.Special Conditions of Contract (SCC)

This Section provides Clauses specific to the particular Contract that modify or supplement Section VI: General Conditions of Contract.

The Special Conditions of Contract (SCC) contain provisions that the GCC require be specified for a particular bidding process. The Purchaser should include at the time of issuing the Bidding Document, all information that the GCC indicate shall be provided in the SCC. No SCC Clause should be left blank.

To facilitate the preparation of the SCC, its clauses are numbered with same numbers as the corresponding GCC clauses. This Guide helps the Purchaser to input all information required. It includes a SCC format that summarizes all information to be provided.

The SCC is the part of Contract Document; therefore, the Procuring Entity shall provide the information in appropriate manner as indicated in the SCC.

Section VIII.Contract Forms

This Section contains the Sample letter for the intention of contract award, Form of the Notification of Award, and Contract Agreement Form, the forms for Performance Security and Advance Payment Security.

If any of these documents or information is missing, the bid shall be rejected.
32.Determination of Responsiveness of Technical Bid	32.1 The Purchaser's determination of the responsiveness of a Bid is to be based on the contents of the Technical Bid itself, as defined in ITB 12.2. 32.2 A substantially responsive Technical Bid is one that meets the requirements of the Bidding Document without material deviation, reservation, or omission. A material deviation, reservation, or omission is one that, (a) if accepted, would: (i) affect in any substantial way the scope, quality, or performance of the Goods and Related Services specified in Section V, Schedule of Requirements; or (ii) limits in any substantial way, inconsistent with the Bidding Document, the Purchaser's rights or the Bidder's obligations under the proposed Contract; or (b) if rectified, would unfairly affect the competitive position of other Bidders presenting substantially responsive bids. 32.3 The Purchaser shall examine the technical aspects of the bid in particular, to confirm that all requirements of Section V, Schedule of Requirements have been met without any material deviation or reservation. 32.4 If a bid is not substantially responsive to the requirements of the Bidding Document, it shall be rejected by the Purchaser and may not

Requesting information or documentation on such non-conformities shall not be related to any aspect of the price of the Bid. Failure of the Bidder to comply with the request may result in the rejection of its Bid. 33.3 Provided that a Bid is substantially responsive, the Purchaser shall rectify non-material non-conformities or omissions. To this effect, the Bid Price shall be adjusted, for comparison purposes only, to reflect the price of the missing or non-conforming item or component. The adjustment shall be made using the method indicated in Section III, Evaluation and Qualification Criteria. 33.4 If small differences are found such as in technical specification, description, feature which does not make the bid to be rejected, then the cost, which is calculated to the extent possible due to such differences, shall be included while evaluating bid. 33.5 If the value is found fifteen percent more than the quoted amount of the bidder on account of small differences pursuant to ITB 32.4, such bid shall be considered irresponsive in substance and shall not be considered for evaluation.
34.Qualification of the Bidder	34.1 The Employer shall determine to its satisfaction during the evaluation of Technical Bids whether Bidders meet the qualifying criteria specified in Section III (Evaluation and Qualification Criteria). 34.2 The determination shall be based upon an examination of the documentary evidence of the Bidder's qualifications submitted by the

If two or more companies or firms have been merged prior to the submission of the bid, the qualifications of the companies or firms existing prior to such merger shall be deemed to form part of the qualifications of the resulting merged firm or company. 34.3 An affirmative determination shall be a prerequisite for the opening and evaluation of a Bidder's Price Bid. A negative determination shall result into the disqualification of the Bid, in which event the Employer shall return the unopened Price Bid to the Bidder.
35.Examination of Price Bids	35.1 The purchaser shall examine the Price Bid to confirm that all documents and financial information requested in ITB 12.3 have been submitted. However, no change in the substance of the bid is permitted during the negotiations. 39.8 If no agreement can be reached as per ITB 39.7, the Purchaser shall cancel the procurement proceedings. 39.9 While evaluating the Bid Price as per ITB 39.3, if the Bid Price of two or more Bidders is found to be equal, the Purchaser shall select the bid for awarding the contract by drawing of lots in presence of Bidders' designated representatives who choose to attend in date, time and place as notified by the Purchaser in writing to the concerned bidders. Section III. Evaluation and Qualification Criteria

The purpose of the Evaluation and Qualification Criteria (EQC) is to specify the criteria that the Purchaser will use to evaluate the Bids to determine the substantially responsive bid closest to the Average Bid Price. The Purchaser must prepare the EQC and include it as a part of the Bidding Document. The EQC is not a Contract document and, therefore, it is not a part of the Contract.

Table of Criteria

1. Evaluation Criteria

1.1Technical Criteria

1.2Domestic Preference

1.3Economic Criteria

1.4Multiple Contracts

2. Qualification Criteria

Evaluation Criteria

Criteria for Bid evaluation are to be determined case by case basis. Select from following the appropriate criteria according to the provisions specified in ITB 39. Retain only the relevant parameters and evaluation methods to apply corresponding to the retained criteria.

1.1 Technical Criteria

These criteria should specify the minimum technical level that the Goods and Related Services shall have in order to comply with the Section V. Schedule of Requirements. Whenever possible, these criteria should be evaluated on a pass–fail system, with a minimum acceptable level for each criteria enumerated.

However, a minor deficiency in technical compliance may not be cause for rejection of the Bid. The cost of making good any deficiency should likewise be added to the Bid Price concerned. The most frequently used methods assign to the non-conforming items or components, prices based on similar methods described above under Scope, with the price of the nonconforming items or components deducted.

1.2 Domestic Preference

If the BDS so specifies, the Procuring Entity will grant a margin of preference to goods manufactured in Nepal. The nationality of the manufacturer or supplier is not a condition for such eligibility. The methods and stages set forth hereunder shall be followed in the evaluation and comparison of bids.

If the bid closest to the Average Bid Price is a bid offering foreign goods, the next closest bid offering domestic goods that is up to 15% more expensive than the bid price of the bid offering foreign goods shall be selected for award.

For granting such preference, the bidder must submit the country of origin issued by competent authority stating that the value added of the goods in Nepal is at least 30 percent.

1.3 Economic Criteria

The economic criteria are most important when evaluating a Bid. In most cases, they are the only criteria for evaluating Bids that have passed the technical evaluation. Price, however, may not be the only criterion, as there could be other criteria that may be expressed in monetary terms. For energy consuming equipment and facilities, adjustment for efficiency over and above the minimum functional guarantees specified in the specifications (e.g. generators, pumps), losses (e.g. transformers), and future operating costs of the equipment may be taken into account in the determination of the evaluated Bid Price. The financial cost for these adjustments (added to or deducted from the Bid Price as the case may be) shall be made only when it is specified in the Bidding Document that these functional guarantees and projected operating costs are factors in bid evaluation. The methods of calculation for these evaluation factors shall be clearly specified in the Bidding Document. Deviations from the specified manner of cost calculation shall not be introduced.

1.4 Multiple Contracts: Not applicable

Technical Specification

Notes on Technical Specifications

The purpose of the Technical Specifications (TS) is to define the technical characteristics of the Goods and Related Services required by the Purchaser. The TS, as a part of the schedule of Requirements (SR), constitute a Contract document and are, therefore, a part of the Contract. The Purchaser must prepare the TS and include them as a part of the Procurement Document, as applicable to each Contract.The Purchaser shall prepare the detailed TS by taking into account that:

- The TS constitute the benchmarks against which the Purchaser will verify the technical responsiveness of Bids and subsequently evaluate the Bids. Therefore, well-defined TS will facilitate preparation of responsive Bids by Bidders, as well as examination, evaluation, and comparison of the Bids by the Purchaser.
- The TS shall require that all Goods and materials to be incorporated in the Goods be new, unused, and of the most recent or current models, and that they incorporate all recent improvements in design and materials, unless provided for otherwise in the contract.
- The TS shall make use of best practices. Samples of specifications from successful similar procurements in the same country or sector may provide a sound basis for drafting the TS.
- The use of metric units is encouraged.
- Standardizing technical specifications may be advantageous, depending on the complexity of the Goods and the repetitiveness of the type of procurement. The TS should be broad enough to avoid restrictions on workmanship, materials, and equipment commonly used in manufacturing similar kinds of goods.
- Standards for equipment, materials, and workmanship specified in the Bidding Documents shall not be restrictive. Recognized international standards should be specified as much as possible. Reference to brand names, catalogue numbers, or other details that limit any materials or items to a specific manufacturer should be avoided. Where unavoidable, such item description should always be followed by the words “or equivalent.” When other particular standards or codes of practice are referred to in the TS, a statement should follow other authoritative standards that ensure at least a substantially equal quality, then the standards mentioned in the TS will also be acceptable.
- The TS shall be fully descriptive of the requirements in respect of, but not limited to, the following:

(a) Standards of materials and workmanship required for the production and manufacturing of the Goods.

(b) Detailed tests required (type and number).

(c) Other additional work and/or Related Services required to achieve full delivery.

(d) Detailed activities to be performed by the Supplier, and participation of the Purchaser thereon.

(e) List of detailed functional guarantees covered by the Warranty and the specification of the penalties to be applied in the event that such guarantees are not met.

- The TS shall specify all essential technical and performance characteristics and requirements, including guaranteed or acceptable maximum or minimum values, as appropriate. The Purchaser shall include an additional Bidding Form, Form Spec-1 (to be an Attachment to the Letter of Bid), where the Bidder shall provide detailed information on such technical performance characteristics in respect to the corresponding acceptable or guaranteed values.

When the Purchaser requests that the Bidder provides in its Bid a part or all of the TS, technical schedules, or other technical information, the Purchaser shall specify in detail the nature and extent of the required information and the manner in which it has to be presented by the Bidder in its Bid (Form Spec-1).

Purchaser Requirement

The Goods and Related Services shall comply with following Technical Specifications and Standards:

2. Detailed Technical Specifications and Standards.

1 Introduction

1.1 Purpose and Scope

This document defines the technical specification for a Van-Based Mobile Radio Frequency Monitoring System (MRFMS), intended for procurement through a competitive tender process. The MRFMV shall be a fully integrated, vehicle-mounted spectrum monitoring, direction-finding (DF) and geolocation system capable of performing spectrum occupancy scanning, signal parameter measurement, spectrum analysis, interference detection, and geolocation of the source of interference or unauthorized transmissions, both while stationary and while in motion.

The specification covers the van platform, on-board power and environmental systems, computing and operator workstation, RF monitoring receiver and direction-finding subsystems, antenna and mast systems, application software, training, warranty, maintenance and after-sales support.

This specification is prepared based on the guidance of Recommendation ITU-R SM.1723-2 (Mobile spectrum monitoring unit), and the ITU-R Handbook – Spectrum Monitoring (Edition 2011) and its 2008 Supplement.

1.2 Background

Mobile monitoring units supplement fixed monitoring stations and are essential where low transmitter power, high antenna directivity, difficult topography, or dense spectrum congestion preclude effective measurement from fixed sites. A van-based platform (classified as an ITU Type 2 vehicle) is Type 2 heavy duty 4x4 SUV vehicle for difficult off-road conditions, steep inclines, and mountain passes, while still supporting a telescopic mast and full monitoring/DF payload.

1.3 Applicable Standards, Recommendations and References

The MRFMV and all associated equipment, measurement methods, and system architecture shall comply with, and be evaluated against, the following ITU-R Recommendations and Handbooks, together with any successor or amended versions in force at the time of contract award:

Reference	Title / Subject
ITU-R SM.1723-2	Mobile spectrum monitoring unit (09/2011)
ITU-R Handbook – Spectrum Monitoring	Edition 2011, and Supplement (2008) – Ch. 3 (Monitoring equipment and automation) and Annex 1 (Monitoring system planning and tenders)

ITU-R SM.854	Direction finding of emissions and location of transmitters
ITU-R SM.1600	Technical identification of digital signals
ITU Handbook – National Spectrum Management	Edition 2015 or latest

Where a bidder proposes equipment or measurement methods based on a Recommendation that has been superseded after the date of this document, the bidder shall clearly identify the applicable revision and demonstrate equivalence or improvement over the version cited herein.

Once the maximum is reached, the Purchaser may terminate the Contract pursuant to GCC Clause 34.

26.78 The Purchaser shall, at the Supplier's request, afford all available assistance to the Supplier in conducting such

Notwithstanding the foregoing, such additional or reduced cost shall not be separately paid or credited if the same has already been

accounted for in the price adjustment provisions where applicable, in accordance with GCC Clause 14.

Force Majeure

26.82 The Supplier shall not be liable for forfeiture of its Performance Security, liquidated damages, or termination for default if and to the extent that its delay in performance or other failure to perform its obligations under the Contract is the result of an event of Force Majeure.

26.83 For purposes of this Clause, "Force Majeure" means an event or situation beyond the control of the Supplier that is not foreseeable, is unavoidable, and its origin is not due to negligence or lack of care on the part of the Supplier. Such events may include, but not be limited to, acts of the Purchaser in its sovereign capacity, wars or revolutions, fires, floods, epidemics, quarantine restrictions, and freight embargoes.

26.84 If a Force Majeure situation arises, the Supplier shall promptly notify the Purchaser in writing of such condition and the cause thereof. Unless otherwise directed by the Purchaser in writing, the Supplier shall continue to perform its obligations under the Contract as far as is reasonably practical, and shall seek all reasonable alternative means for performance not prevented by the Force Majeure event.

Change Orders and Contract Amendments

26.85 The Purchaser may at any time order the Supplier through Notice in accordance GCC Clause 7, to make changes within the general scope of the Contract in any one or more of the following:

(b) the method of shipment or packing;

(c) the place of delivery; and

(d) the Related Services to be provided by the Supplier.

26.86 If any such change causes an increase or decrease in the cost of, or the time required for, the Supplier's performance of any provisions under the Contract, an equitable adjustment shall be made in the Contract Price or in the Delivery and Completion Schedule, or both, and the Contract shall accordingly be amended. Any claims by the Supplier for adjustment under this Clause must be asserted within thirty (30) days from the date of the Supplier's receipt of the Purchaser's change order.

26.87 Prices to be charged by the Supplier for any Related Services that might be needed but which were not included in the Contract shall be agreed upon in advance by the parties and shall not exceed the prevailing rates charged to other parties by the Supplier for similar services.

Within the contract period, the Purchaser shall evaluate the situation and may at its discretion extend the Supplier's time for performance, in which case the extension shall be ratified by the parties by amendment of the Contract.

26.89 The Supplier shall submit Performance Security, Advanced Payment Guarantee (if any) and Insurance Policy documents, as required with extended validity, within fifteen (15) days of receiving the Letter of Extension of Intended Completion Date from the Purchaser.

The Purchaser may deduct the fine from payments due to the Supplier.

26.91 Except in case of Force Majeure, as provided under GCC Clause 31, a delay by the Supplier in the performance of its Delivery and Completion obligations shall render the Supplier liable to the imposition of liquidated damages pursuant to GCC Clause 26, unless an extension of time is agreed upon, pursuant to GCC Sub-Clause 33.1.
