Trained Technical Human Resources

July 2026

Provincial Resource Persons for NWASH-MIS

Technical Enumerators for Water Supply Systems

Master Trainers on Behaviour Change Communication for WASH (Total Sanitation)

Roster Booklet

Objective of the Booklet

The WASH Systems for Health (WS4H) Project has been collaborating with the NWASH-MIS Section of the Department of Water Supply and Sewerage Management (DWSSM), the National Water Supply and Sanitation Research, Innovation, and Capacity Development Center (NWSSRICDC), the Ministry of Water Supply, Irrigation, and Energy (MoWSIE) of Koshi Province, and the Ministry of Energy, Irrigation, and Water Supply (MoEIWS) of Madhesh Province in developing capacities in Koshi and Madhesh Provinces to support local governments on WASH governance and implementation.

In WASH governance, this has included applying the DWSSM's National WASH Management Information System (NWASH-MIS) for collecting data and assessing the status of WASH (practices and services), geo-referencing of infrastructure assets, calculating pre-feasibility level costs for improving public water supply infrastructure and WASH facilities in institutions and public toilets, and using this data to guide priorities for investment in WASH by local governments.

In implementation, the aim has been to improve WASH practices at a municipality level (community, households, institutions) by building capacities of local government staff and change agents for Behaviour Change Communication around behaviours of Total Sanitation (based on the Total Sanitation Guidelines, 2016).

Under the leadership of the MoWSIE and MoEIWS, the Project has engaged a pool of professionals, conducted targeted capacity building, mobilised them for specific tasks, and verified their capabilities as thematic experts whereby they can support local governments in operationalising the NWASH-MIS and conducting trainings for local governments on WASH BCC, respectively.

This roster booklet profiles these individuals, presenting their verified areas of expertise in the above themes as well as their overall qualifications and experience, in a standardized, one-page format. This pool of qualified professionals is presented in three categories:

(i) Provincial Resource Persons (PRPs) for NWASH-MIS

(ii) Technical Enumerator for Water Supply Systems in NWASH-MIS

(iii) Master Trainers (MTs) on Behaviour Change Communication for WASH (Total Sanitation)

The objective of this booklet is:

- To formally introduce this pool of vetted human resources and to serve as a quick-reference directory connecting government agencies with expertise on NWASH-MIS as a whole, technical data collection on water supply systems required for the NWASH-MIS, and BCC on WASH practices.
- To reduce the need for repeated recruitment and training, preserve institutional knowledge, and support consistency in capacity building initiatives for local governments on WASH.

Any capacity building process relies on continuous updates of knowledge and skills. Hence, this roster is applicable for the financial year 2026-2027 and would require updating to stay relevant for new developments in NWASH-MIS and BCC for WASH.

Provincial Resource Persons for NWASH-MIS

Provincial Resource Persons (PRPs)

Who Are They

PRPs are technical consultants who have been engaged by the WS4H Project in collaboration with the MoWSIE of Koshi Province or the MoEIWS of Madhesh Province to support targeted local governments (LGs) in using the NWASH-MIS system. They are professionals originally from and residing in Koshi or Madhesh Provinces who have been working as a bridge between provincial authorities and local governments to support progress on the national policy of adopting the NWASH-MIS for LG-level WASH assessment and evidence-based planning.

Educational Qualification

PRPs hold at least a bachelor's degree in public health, engineering, or a related WASH discipline.

Technical Qualifications on NWASH-MIS

PRPs have received structured capacity building through the joint initiative of the Project, the NWASH-MIS Section, and NWSSRICDC on the NWASH-MIS implementation process, data collection applications, and data management and use. Specifically, capacity building topics have included process facilitation of all steps with the relevant stakeholders in the LG; training of social enumerators (premises-level data and information on waste management facilities) and technical enumerators (water supply system data) collection, quality control, and validation; dashboard management; and data analysis and use for investment prioritisation and evidence-based planning. PRPs have applied their skills in targeted municipalities with mentoring and technical backstopping of the Project and NWASH-MIS teams.

Figure 1 shows the workflow diagram that comprises all the steps to complete data collection on the NWASH-MIS system, generate a basic report (reference document) from the system, and develop a detailed plan to guide LG level investments and planning. The Project has identified three competency areas that are required by technical consultants such as PRPs to guide and capacitate LGs across all steps in the diagram. Figure 1 shows the steps (color-coded) associated with each competency area.

What Can They Deliver

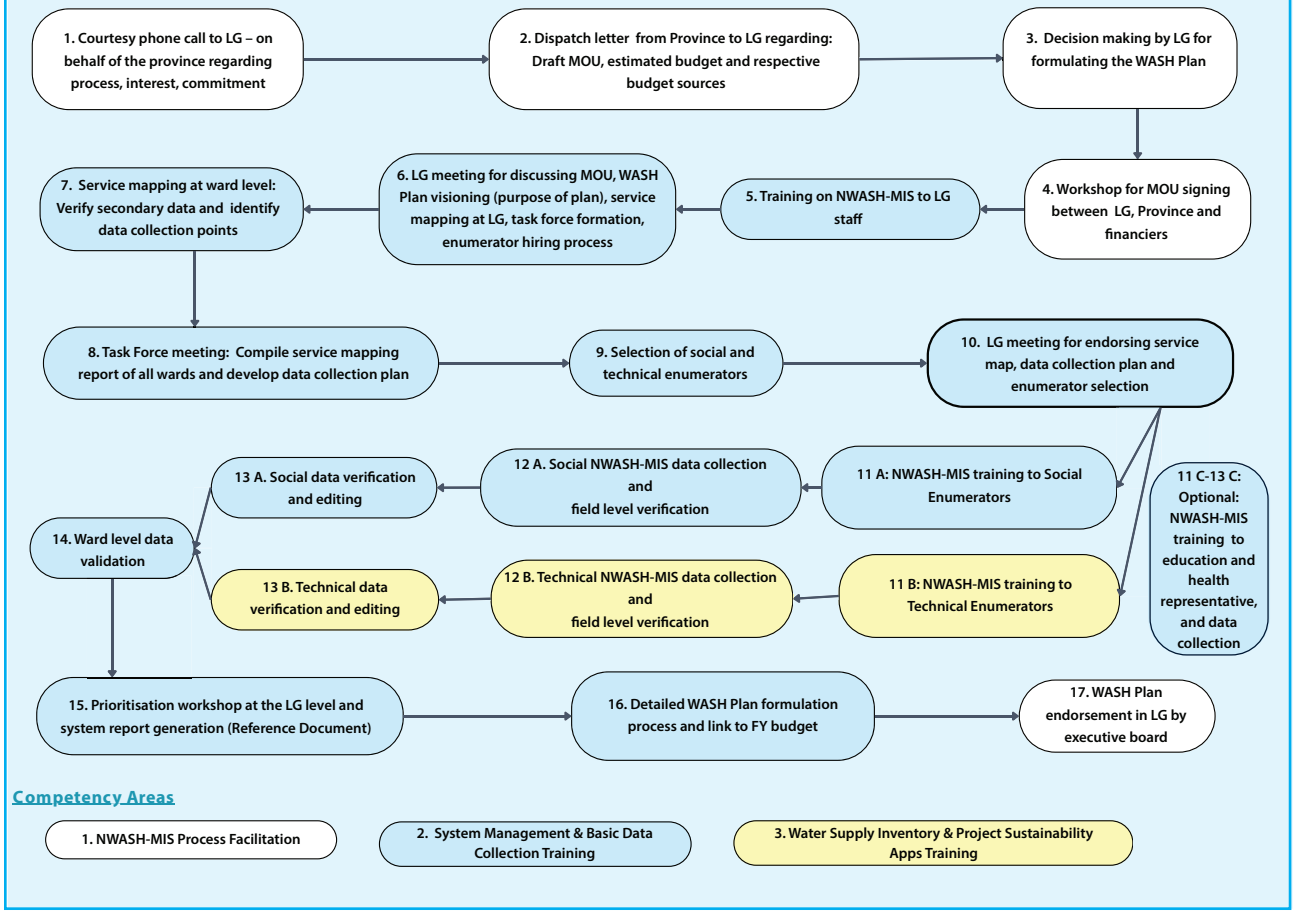

PRPs can deliver services on one or more of the three competency areas shown below. The individual profiles provided in this booklet identify the competency areas that the respective PRP can deliver. To operationalise the NWASH-MIS within a LG in its entirety, PRPs would need to be mobilized for all three competency areas to ensure all steps in Figure 1 are completed adequately.

- **Competency Area 1- NWASH-MIS Process Facilitation** (Figure 1, white boxes): PRP can organise all steps across the workflow diagram. Specifically, the PRP can ensure that all governance processes including agreements, decision-making, and endorsement are completed; local government and relevant stakeholders are mobilized at each stage for local ownership, leadership, and engagement; relevant technical expertise is engaged for trainings; and local resources are mobilized for data collection.

- **Competency Area 2- System Management and Basic Data Collection Training** (Figure 1, blue boxes): PRP can provide guidance on technical processes in using the NWASH-MIS and basic data collection training. Specifically, support on technical processes includes workshops with LG stakeholders on mapping the required data, validating compiled data, and using the data to prioritise infrastructure requiring construction or upgrading and developing a detailed WASH plan. Support on basic data collection includes provision of training to (i) LG WASH and IT professionals on NWASH-MIS orientation data collection tools and processes, system operation, and data management; and to (ii) social enumerators, for data collection at premises-level (household, school, health facility, public toilet) and on waste management facilities.

- **Competency Area 3- Water Supply Inventory and Project Sustainability Apps Training** (Figure 1, yellow boxes): PRP can provide technical support to collect, verify, and edit data on water supply infrastructure assets. Specifically, the PRP can provide training to Technical Enumerator for Water Supply Systems on the Water Supply Inventory and Project Sustainability Applications. The Water Supply Inventory App collects data on water supply system assets and their condition, while the Project Sustainability App collects data on the operation and management aspects of water supply systems. Furthermore the PRP can provide supervision and monitoring of ongoing data collection and subsequent cleaning and editing of data uploaded in the system.

Ram Bhajan Mahato

Provincial Resource Person For NWASH-MIS, Madhesh Province

+977 9844025311, +977 9814875356 | Anand Nagar-4, Janakpur, Dhanusha
rambhajanmahato943@gmail.com
Date of Birth: September 7, 1982

NWASH-MIS COMPETENCIES

[✓] NWASH-MIS Process Facilitation

SUPPORTED LOCAL GOVERNMENTS

Siraha: Arnama RM, Nawarajpur RM, Naraha RM, Laxmipurpatari RM, Sakhuwa Nankarkatti RM, Aurahi RM
Saptari: Tirahut RM, Mahadewa RM, Chhinmasta RM, Balanbihul RM
Dhanusha: Ganeshman Charnath Mun.

OTHER AREAS OF EXPERTISE

WASH:
Master training, meeting facilitation, WASH plans and guideline development, community-led total sanitation training

Health and Nutrition:
Training on health and nutrition of children and lactating women, nutrition profile development in LGs

Livelihood and Income Generation:
Training, business plan development, income tracking

Disaster Risk Reduction ad Climate Change Adaptation:
Plans and guideline development for LGs

DISTRICTS OF WORK EXPERIENCE

Madhesh: Dhanusha, Siraha, Saptari

Technical Emumerators for Water Supply Systems

Technical Enumerators for Water Supply Systems

Who Are They

Technical Enumerators for Water Supply Systems are field-level technicians residing in Koshi or Madhesh Provinces who have been engaged by LGs to collect geo-referenced data on water supply infrastructure assets and the operation and management of water supply systems. Finding enumerators who are technically qualified and motivated to complete the physical work of mapping water supply infrastructure at the local level remains a significant challenge. These Technical Enumerator for Water Supply Systems have successfully qualified and demonstrated their willingness to support first-time inventory assessment as well as future data updates and monitoring cycles in LGs within their districts and/or surrounding areas.

Educational Qualification

Technical Enumerators for Water Supply Systems hold, at minimum, a Sub-Overseer level qualification in Engineering or a higher secondary qualification with related experiences in the WASH sector.

Technical Qualifications on NWASH-MIS Data Collection

Technical Enumerators for Water Supply Systems have received conceptual and hands-on training on the Water Supply Inventory and Project Sustainability Apps in the NWASH-MIS, covering topics on data entry protocols, device operation, and system navigation for water supply systems. The training builds their competency to independently and reliably operate the digital data collection platform, with particular emphasis on maintaining completeness and accuracy in every data point recorded.

What Can They Deliver

The Technical Enumerators for Water Supply Systems can apply their technical knowledge on water supply scheme layout and structures and their digital skills on the Water Supply Inventory and Project Sustainability Apps to complete the process of technical data collection required for the NWASH-MIS. These apps provide data on water supply system assets and their condition, and on the operation and management aspects of water supply systems.

Master Trainers on Behaviour Change Communication for WASH (Total Sanitation)

Master Trainers

Who Are They

Master Trainers are experienced facilitators who have been mobilized by the WS4H Project to coordinate and deliver "Training of Trainers" (ToT) in targeted LGs of Koshi and Madhesh Provinces for area-wide BCC campaigns on the behaviours of Total Sanitation. The Master Trainers are nationals (with most residing within Koshi or Madhesh Provinces) who are available to provide their services in the two provinces and can be deployed for guiding and supporting WASH behaviour change campaigns in LGs.

Educational Qualification

A Master Trainer holds a bachelor's degree in public, social sciences, education, development studies, WASH or a higher secondary qualification with related work experience in the WASH or health sectors, community mobilization, or training delivery.

Technical Qualifications on BCC for Total Sanitation

Master Trainers have received a 6-day Master Training of Trainers (MToT) building competency on BCC concepts and campaign facilitation; capacity building skills (delivering ToT sessions for trainers, mentoring the trainers to deliver trainings for facilitators, and providing oversight on campaign facilitation); and knowledge across eight key behaviours in Total Sanitation — access to and hygienic use of toilets for all, safe child faeces management, handwashing with soap at critical times, menstrual health and hygiene management, use of safe drinking water, safe food preparation and consumption, household and premises hygiene, and safe management of waste and wastewater.

Following the MToT, under the oversight of a BCC expert, they have practiced their skills by delivering a 5-day ToT session in a targeted rural municipality with 15–25 trainers, including health and education coordinators, Health Facility In-charges, WASH Focal Persons, and active community and women leaders. The ToT provides skills to these municipality level trainers to further capacitate facilitators (including female community health volunteers- FCHVs, schools, health facilities, and community leaders) in rolling out BCC campaigns with different target groups in the municipality. The Master Trainers have been provided with a set of training materials and BCC facilitation materials to enable them to implement further ToTs.

What Can They Deliver

- Delivering ToT sessions to LG participants and building trainees' confidence and skills for cascading trainings to facilitators of BCC campaigns including FCHVs, schools, health facilities, and community leaders.
- Observing and coaching LG-level trainers as they deliver training to facilitators of BCC campaigns.
- Ensuring consistent messaging, correct use of materials, and adherence to ethical and safeguarding standards.
- Maintaining records of trainings, participants, and supervision visits, and submitting progress reports on achievements, challenges, and lessons learned.

BINOD KUMAR DAS
